ACKNOWLEDGEMENT

The name of Allah S.W.T, the most Beneficent, the most Merciful, the most Gracious, the Dispenser of Grace, Salam to Nabi Muhamarrnad S.A.W. His companion and friends as well to all the people who follow his path.

I would like to express my deep and sincere appreciation to my supervisor, En. Abdul Rahman Ayob, Head Division of Construction Engineering and Project Management, Faculty of Civil Engineering, Universiti Teknologi MARA Pulau Pinang for his advice, careful guidance, suggestions and encouragement toward the accomplishment of this thesis.

Not to forget the all contractors or organizations through its Senior Project Coordinator or Project Manager on cooperation in providing much useful information.

These acknowledgements would be incomplete unless I thanked my lather, Mr. Abdullah Bin Ab. Kadir and my mother, Mrs. Kamariah Bt. Kader for their understanding and supports in preparing this thesis. I would never repay you for all you have done for me, your support is priceless. I'm grateful to have both of you in my life. Thank you for giving me everything.

At last but not least, my sincere thanks and appreciation to colleagues and who have contributed to the successful preparation of this thesis, one way or another.

Without their assistance, this report could never hare been written.

AD.JOHAN BIN ABDULLAH
(NOVEMBER 2006)

ABSTRACT

This thesis studies the identification of common problems faced by Bumiputera contractors in Perlis and Pulau Pinang. The data collections were used to explain level of the common problems by the contractors, the difference between contractor's demographic factors toward common problems. The samples consist of 50 contractors in Perlis and Pulau Pinang, then the data was collected using self-administered questionnaire. For the analyses One-way ANOVA were used in this study. The result indicated that the level of the common problems faced by Bumiputera contractors in Perlis and Pulau Pinang is low. However, contractors in F class tend to face with the common problems compared with the contractors in A class. The common problems have simplified into the unique problems which is consist of the financial, procedures, human resources, management and the others problems. There was no difference in unique problems between the respondents joined the company (in Year). The interesting finding in this study because it can be determined the problems rank due to the frequency of the problems faced. Therefore, the common problems faced by the Bumiputera contractors in Perlis and Pulau Pinang are not very seriously but its can bring negative effect to their company performance. The finding of this study about the common problems faced by Bumiputera contractors can be useful and make it as guidance for the other researchers in the future. This study also provides suggestions and recommendations for future research.
