ACKNOWLEDGMENT

Praise be to Allah s.w.t. for His consent I have successfully completed my project paper.

A very special regards and thanks to my beloved mother, Siti Makwa Mat Rachi, my brothers and sisters for their utmost blessings, (full understandings, love and unfailing support for completion of this project paper.

I would also like to express warmest gratitude to my respectable adviser Dr. Hayati Mohamad for her guidance and assistance in making this study a success.

To Dr. Rokiah Hassan , my course tutor, for sharing meaningful ideas throughout this study and also my lectures and friends who have either directly or indirectly, involved in the progress of this study.

Lastly, another warm appreciation to Dr. Ahmad Sahbari @ Sobri Salamon and to International Islamic University excellent staffs, for their cooperation in providing related information and data for the purpose of this study.

" May Allah Bless Them "

1. INTRODUCTION

The *shari'ah* permits investment of only those shares, bonds and investment certificates which entitled the holder to some of the profits of the company, in proportion to the number of shares held. This position of the *shari'ah* immediately makes other forms of investment, both short and long term, unlawful because in all cases, income from predetermined return or interest rate are associated in one way or another.

As we understand, preference shareholders received a fixed rate of dividends on their holdings which is met before the ordinary share dividends is paid. If the company's profits do not justify paying any dividend, they may also receive nothing. Some companies, however, have preference shares which has the entitlement to a preference dividend carried over until the company is in a position to pay all the arrears.

The choice between buying ordinary shares and buying preference shares comes down to the degree of risk which the investors is prepared to bear. The ordinary shares carries a greater risk and, therefore, a greater prospect of high dividends to compensate for the risk. While investment in ordinary shares is perfectly lawful, investment in preference share is not. This is basically due to the similarity between the predetermine dividend rate of return against that of interest payment; both are fixed percentages of the amounts invested. Since Muslim jurist, in general, consider interest as usurious (*al-Riba*), dealing with preference shares is tantamount to dealing
