Dissertation Title : Relationship Between

Intellectual Capital and Financial Performance of Shariah Compliant

Construction Firms

Date : December 2018

ABSTRACT

Intellectual Capital has been used in past few studies to analyse its' relationship on firms' performance. As intangible resources, the researchers and also financial management organizations intend to know how these resources can create value to the firms and can improve the firms' financial performance. This intangible resource also been in Malaysia Plan since 8th Malaysia Plan until to date 11th Malaysia Plan and has been main agenda to boost the growth of the Malaysia's economy. Construction sector is one of the main contributor to the growth of Malaysia economy reported in the past Malaysia Plan's achievement in terms of good compounded annual growth rates. This study will focus on construction firms which Shariah compliant and listed in Bursa Malaysia because of none studies previously carried-out on Shariah compliant firms and the sector also is the most highest Shariah compliant contributions out of its' sector total securities listed in Bursa Malaysia. This paper will focus on exploring the components of Intellectual Capital (human capital efficiency, structural capital efficiency and capital employed efficiency) and its' influence on the performance of Shariah compliant construction firms listed in Bursa Malaysia. The findings have indicated that capital employed efficiency is the component that have significantly influenced on the performance of Shariah compliant construction firms listed in Bursa Malaysia. The results of this research have created important implications for investors. managers as well as policy makers in order for them to make strategic investments and financial decisions. This research also helps to fill the gaps exist in this research area when conducting research on components of intellectual capital that influence the Shariah compliant construction firms listed in Bursa Malaysia.

ACKNOWLEDGEMENT

Foremost, we would like to express our most gratitude to the Almighty Allah for all the wisdom He had granted us, the peace of mind, the health and the time in the journey of completing this thesis. We also would like to thank to each of the significant and insignificant person who had directly or indirectly contribute to the production of this research especially our beloved and helpful advisor Dr Mohamad Nizam Jaafar as without her valued taught, time, continuous support and guidance we might not be able to finish the entire process of this study. Next acknowledgement goes to our classmates who had really supported us in making sure that this research was done accordingly. Not to forget and on a more personal note, we would like to extend our gratitude to our parents, family members and friends as without their full and continuous supports, we will also might not be able to complete the journey. Last but not least, our appreciation goes to any individual or groups who have giving us their help and contributions within our period in completing our Master's Degree. We really hope that this research will be benefited by everyone on every single aspect.

Thank you.
