## ACKNOWLEDGEMENT

Alhamdulillah, we have finally completed our project paper. We faced certain obstacles along the journey adding to the very short period of time in finalizing this paper. At first we were quite worried that we would not be able to complete this task in time. Luckily with the help of a number of people, this project paper seems quite easy to do. Therefore, we would like to extend our deepest gratitude and thanks to the parties below.

In the name of Allah, the most merciful and most gracious, He had given us strength and patience in finishing this project paper.

A big acknowledgement to our beloved supervisor, Puan Norila Abu Hassan for sharing her knowledge and giving us the guidance that we needed most. Thank you for accepting the responsibility of being our supervisor although she has told us that she is not very familiar with the area of labour law. We are very sure that we would be lost without her.

A big thank you to Tenaganita Sdn Bhd for giving us the opportunity to interview one of the officers there, Miss Maslina Abu Hassan who had provided us with a lot of information and answered all of our questions without any hesitation. The newspaper clippings that she had have given to us assisted in listing the cases involving physical abuse against women migrant domestic maids. The information that she have provided are very valuable for our project paper. We really admired her endless effort in protecting the domestic maids from the cruelty of their employers. We hope that the hard work of Tenaganita in search of the best protection for the domestic maids in our country as to their rights will come to an end.

Also, a big thank you to Puan Jashpal Kaur for her consultation regarding the law which governs the domestic maids. Even though our consultation session was very short, it was a good exposure for us in collecting the data that we needed for our project paper. She had helped us to rephrase our project paper title to an acceptable title.

Finally our gratitude and thank stretch to our family for their support and encouragement. They had given us perpetual love and confidence that we will cherish throughout our years of life.

This research project has been carried out by a team which has included me, Noor Aishah Binti KM Abu Bakar, Zetty Shahfrina Binti Abdul Rahman and Siti Nor Asmah Binti Mohd Noor Nordin. All the research work was done by all of us. Zetty Shahfrina had volunteered to check all the chapters accordingly and make sure that we had included all the important part while Siti Nor Asmah made the editing for the corrections. I did all the last editing and lastly compiled the research project.

## ABSTRACT

The title of our project paper is “The Physical Abuse of Domestic Maids – An Analysis of The Extent to Which Local Laws Protect These Maids”. In Chapter One, we provided the history, background study of the entry of the Indonesian domestic maids to Malaysia and we mentioned the objectives and scope of our study. The significance and the limitations of study are also included in this chapter.

In Chapter Two, we have used several articles written by various authors for the literature review. From our observation, we have found that most of the authors wrote about abuse in general. Also, they did not give their recommendations in solving the matter.

In the Third Chapter, we decided to do an analysis on the related issues of the physical abuse against domestic maids. In this chapter, we gave an overview definition of domestic maids and the proximate number of maids working in Malaysia. Indonesia has the highest number of domestic maids working in Malaysia and the worst protection of rights among other countries.

In Chapter Four, we focused on the issue of physical abuse of these domestic maids and the feedback from Malaysia and Indonesia to solve the issue.

In Chapter Five, we did an overview of the law and rights of the domestic workers in Malaysia and we mentioned about the rights that these domestic maids should get.

In the Last Chapter, we have provided the recommendations to solve this issue.
