First and foremost, we would like to thank Allah S.W.T upon bestowing us with His guidance in completing this research. Our sincerest and deepest gratitude goes to our supervisor, Puan Fazlin binti Mohammad Zain, whose had patiently encouraged, guided, supported and sacrificed her time from the initial to the final level in order to enable us to develop an understanding on the subject matter. We also like to express our gratitude to Mr. Azmi Adnan, an education psychology lecturer of the Faculty of Education of UiTM, for giving us in depth view pertaining to the concept of education policy in Malaysia and the USA. Thousand thanks also we bid to Dr. Ihsan Ismail, Special Officer from the Policy Department of Ministry Of Education in supplying us with the required information. Last but not least, we offer our regards and blessings to all of those who supported us in any respect upon completing this project.

ABSTRACT

This research is basically a comparative legal study on education policy between Malaysia and the United States of America. This study sets out to discover the inadequacies of Malaysia's education policy as to the global needs today. Thus study also seeks to discover whether the American education policy is better than ours and the possibility of its application to the Malaysian current standing. There are negative perceptions on students who cannot excel academically and there is also poor mastery of English language as the second language. Evidences obtained through the research showed that it was due to several inadequacies in our education policy. We found that there are several American education policies that may be suitable to be incorporated in our education policy. But still, such incorporation should be slightly amended so it would suit with the uniqueness of Malaysian culture and society.
