ABSTRACT

This applied research addressed the level of awareness among MMU's staff about data protection and policy used in organization. The researcher wants to know whether the MMU's staff alert about the existence in data protection. Based on the hypothesis in this research it shows that staffs lack of awareness about data protection can lead to cyber interference. For the second hypothesis is the policy that has been implemented affects the organization. The researcher was conducting the survey by using the questionnaire that had been distributed to the staff in Multimedia University: Do you know about data protection? Do you know data content in data protection? Do you know about Personal Data Protection Act 2010? Where do you get the information about data protection? An analysis of the data revealed that almost of staff in IT department aware about data protection in MMU's but them not clear about function and content about data protection. It was recommended that have a good practices and education about data protection. In addition, referring the expertise can assist the policy maker to create better and understanding policy. The policy used in the organization should be improvised and enforce.

ACKNOWLEDGEMENT

Our utmost gratitude to Allah S.W.T the Almighty for giving us life and the strength to make use of this opportunity to enhance our knowledge and complete this research. May peace and blessing be upon our great prophet Muhammad S.A.W

Through only our name appears on the cover of this research, a great many people have contributed to its production. We owe our gratitude to everyone who have made this research possible and because of whom our graduate experience has been one that we will cherish forever.

En. Mohd Faizal bin Mohd Ramsi, our research supervisor. We have been amazingly fortunate to have a supervisor who gave us the freedom to explore on our own and all guidance to recover when our steps faltered. He taught us how to questions thoughts and express ideas.

Pn. Siti Nuur-Ila binti Mat Kamal for her insightful comments and constructive criticisms at different stages of our research were thought provoking and she helped us focus our ideas. We are grateful to her for holding us to a high research standard and enforcing strict validations for each research results, and this teaching us how to do research.

To all Faculty of Information Management, UiTM Johor lecturers and friends who helped us during this research. Their support and care helped us to overcome setbacks and stay focused on our study. We greatly value their friendship and we deeply appreciate their belief in us.

We wish to express our gratitude to all MMU IT Staff who involved with our questionnaires, shared their time and experience with us. Most importantly to our family, there is no other thing that can give us strength better than their prayer and love.
