ACKNOWLEDGEMENT

Alhamdulillah, I have been completed my final year report and complete my semester 6. First of all, I would like to express my highest gratitude to Allah S.W.T for His guidance, bless and for giving me the strength to perform my responsibilities as a final year student and to complete this final year project report (FYP) within the stipulated time.

The special thanks goes to my helpful supervisor FYP, Puan Kamarul Ain Kamal who has given me a lots of guidance and advice that help me from time to time during the project conducted. All the guidance that have been given to me, it give me many benefit about how to conduct an issues in our site study professions and I will use it for the future.

Great deals appreciated goes to the TPS 352 Final Year Project subject coordinator, Miss AnaKasfi Muhammad, as my lecturer that take responsibility for this final year project (FYP) because she really hard worked to make sure that my FYP report was accepted and completed.

Lastly, to my family and friends that also give me strength and guide to continue my journey as a final year student and complete my final year report. Thank you to all of you that involve as direct or indirect to make sure my FYP completed.

ABSTRACT

Final Year Project (FYP) report are about the issues of lack of safety, management and maintenance at Taman Rekreasi Ampang Jajar. It is the work of administration, planning and maintenance to develop a healthy recreation park. Maintenance and management system the recreational park is one of the facilities that the Majlis Bandaraya Seberang Perai (MBSP) according to the Jabatan Perancangan Bandar and Desa,2013. This recreation park are still does not reach the level of satisfaction desired by the visitors. In this study, there are some issues related to the problem statement, which is safety issues for visitor, the level of management system is inefficient and the level of maintenance of the amusement park is not satisfactory. The objective of this study is to identify element of available facilities and equipment in recreation planning, to identify the issues and problem that have in Taman Recreation Ampang Jajar and the lastly is to propose the effective solution to increase visitor rates in this recreation park. There are two type of data collection in this study project which is primary data and secondary data. Primary data consists of observation, questionnaire, and interview. Secondary data consist of various sources such as books, journals, websites, theses and etc. Statistics Package for Social Sciences (SPSS) software are also have been used in this study method. This study involves 40 respondents form the users who visited Taman Rekreasi Ampang Jajar. Suggestions and recommendations were forwarded on the measures to be taken by responsible parties to make sure that the level of management and maintenance are at the highest level.
