ACKNOWLEDGEMENTS

IN THE NAME OF ALLAH, THE MOST GRACIOUS, THE MOST MERCIFUL

Firstly, we are grateful to Allah S.W.T for giving us the strength to complete this project successfully.

We would like to express our deepest gratitude and appreciation to our final year project supervisor, Mdm. Rasidah Bt Buang, who contributes to stimulating suggestions and encouragement, helping us to coordinate this project, particularly by being our solid guide to this report.

A special thank you goes to team mates, who showed good teamwork and synergy put their full effort into assembling the parts, offering suggestions for the task and guiding the team to achieve the goal. We need to appreciate the guidance given by other lecturers as well as the panels especially in our project presentation, which has improved our presentation skills thanks to their comments and advices. Last but not least, many thanks go to our classmates and families who have helped and supported the progress of this paper.

ABSTRACT

Fresh graduates have been wondering what are the criteria prioritized and demanded by public and private companies in hiring them as new employees. This has become a concern to the graduates knowing that there are graduates who failed to secure job. Firstly, this paper is intended to reveal the overall and natural results of what fresh graduates are looking for in the current period based on the six selected criteria for the employee selection and secondly, to recognize the quality ranking of students for each type of higher learning institutions (HLIs). The Analytical Hierarchy Process (AHP), a well-known process towards solving different decision-making problem, is used in this research. The results revealed that ‘Communication Skill and Language Proficiency’ is listed as the first criterion prioritized by firms and ‘Student Involvement in Co-Curriculum’ was the least selected in criteria ranking. Next, for the quality of HLIs, IPTA is ranked to be the top rank between HLIs while colleges are listed in the last place of the ranking. The study is hoped to be beneficial for fresh graduates, especially in preparing and enhancing the needed criteria to get hired and as guidelines for higher learning institutions in taking actions to improve the quality of their students regarding the related criteria.
