## AUTHOR'S DECLARATION

I declare that the work in this thesis was carried out in accordance with the regulations of Universiti Teknologi MARA. It is original and is the results of my own work, unless otherwise indicated or acknowledged as referenced work.

I, hereby, acknowledge that I have been supplied with the Academic Rules and Regulations, Universiti Teknologi MARA, regulating the conduct of my study and research.

Name of Student : Nurul Aisyah Binti Abdul Wahab  
Student I.D. No. : 2016263754  
Programme : Bachelor of Engineering (Hons) Electrical &  
Electronic  
Faculty : Faculty of Electrical Engineering  
Thesis : Traffic Lane Navigation System using Image  
Processing  
Signature of Student :  .....  
Date : July 2020

## **ABSTRACT**

Traffic lane navigation system has received a lot of attention in recent years. It can help the user in assisting the route planning and it played a great role in driving system. The main problem arises when there were many accidents occur due to the careless of the driver on the driving that have be among the main reason when the accident occurs. Failure to keep in the proper lane or running of road become the famous factor for the drivers involved in fatal crashes. This project introduced the traffic lane navigation system using image processing. This system helps the driver to drive safely within the road lane. The image processing technique used to detect and navigate traffic lane was Hough Transform. This project was using the recorded road lane video that have capture the view of the driving mode on road and detect the traffic lane via image processing and computer vision techniques. It was a process that combines color and edge information to detect the lane marking. The technique involved the process of interest region selection, noise filtering, edge detection and hough transform. All the process in this project was using MATLAB software. This project was able to assist the driver to drive safely.

## **ACKNOWLEDGEMENT**

In the Name of Allah, the Most Gracious, the Most Merciful. Praise and glory is due to the Almighty Allah, thanks for giving me the strength and Alhamdulillah I manage to complete my final year project. I also would like to thank numerous people for the help and guidance along the time I do my project.

First of all, I would like to use this opportunity to express my deepest gratitude to my supervisor, Dr Rozan Boudville who in spite being busy with his duties, took time for giving me continuous guidance, encouragement and advice to accomplish this final year project and for preparation to the thesis. I also would like to thanks the Faculty of Electrical Engineering University Teknologi Mara Pulau Pinang for giving me as the student to use the necessary facilities and help to guide the student follow the university plan along my degree.

I expressed my deepest thanks to my lovely parent for their prayer and support during my studies. I choose this moment to acknowledge their contribution gratefully. Also a big thankful to all my friends that always have given me laugh, moral support and beautiful memories during my studies period.

Last but not the least, appreciation to other people that give support technically or mentally during finishing this project.

# TABLE OF CONTENTS

	<b>PAGE</b>
<b>AUTHOR'S DECLARATION</b>	<b>i</b>
<b>ABSTRACT</b>	<b>ii</b>
<b>ACKNOWLEDGEMENT</b>	<b>iii</b>
<b>TABLE OF CONTENTS</b>	<b>iv</b>
<b>LIST OF TABLES</b>	<b>vi</b>
<b>LIST OF FIGURES</b>	<b>vii</b>
<b>LIST OF SYMBOLS</b>	<b>viii</b>
<b>LIST OF ABBREVIATIONS</b>	<b>ix</b>
<b>CHAPTER 1 INTRODUCTION</b>	<b>1</b>
1.1 OVERVIEW	1
1.2 BACKGROUND OF STUDY	1
1.3 PROBLEM STATEMENT	2
1.4 SIGNIFICANCE OF THE STUDY	3
1.5 OBJECTIVE	3
1.6 SCOPE OF WORK AND LIMITATION	3
1.7 THESIS ORGANIZATION	4
<b>CHAPTER 2 LITERATURE REVIEW</b>	<b>5</b>
2.1 OVERVIEW	5
2.2 ADVANCE DRIVER ASSISTANCE SYSTEM	5
2.2.1 Example of Advance Drive Assistance System (ADAS)	5
2.3 LANE DETECTION SYSTEM	8
2.3.1 Edge Detection	8
2.3.2 Hough Transform	11
2.4 COMPUTER VISION	13
2.4.1 Function or Process on Computer Vision	14
2.4.2 Application of Computer Vision	17
2.5 IMAGE PROCESSING	19

2.5.1	Aspects of Image Processing	20
2.6	TYPE OF IMAGES	21
2.6.1	Grayscale Images	21
