ABSTRACT

Assalamualaikum w.b.t. My name is Farid Hakim Bin Jaidon, student of Faculty of Civil Engineering *UiTM Kampus Johor Cawangan Pasir Gudang*. The main reason for the students to do Industrial Training (IT) is to make sure that they will be well prepared and exposed to the real-life experiences of the engineering works and to get them involved in Civil Engineering projects before graduation. IT is a chance for students to apply what they have learned in university into real life and for sure to learn new things.

First of all, this report is about my IT that I have been go through for two (2) months which is 7 weeks in total. I did my IT at *Perbadanan Putrajaya (PPj)* or known as Putrajaya Corporation (PJC). I applied three (3) companies for my IT and only offered by two companies which are PJC and Putra Perdana Sdn. Bhd. I chose PJC instead of Putra Perdana because based on information from my sister who lives in Putrajaya for 10 years PJC is better than Putra Perdana because it has many scope of work that is consultant, construction and maintenance. Furthermore, PJC is near from my sister's house.

Next, I have gain many experience during my IT at PJC after meeting new people with lot of knowledge and experience of many years. This report consists of four main chapters. Chapter 1 will be the introduction of the report, chapter 2 is all about the weekly summary of IT based on logbook, chapter 3 will be the technical report of the IT and chapter 4 is the conclusion of the report.

ACKNOWLEDGEMENT

Alhamdulillah thanks to Allah S.W.T. for giving me strength in completing my Industrial Training (IT) and this report. First of all, a special appreciation goes to Mr. Firdaus Akhbar, IT coordinator for all the helps and information about IT. I would like to thank to Mrs. Shuhaila Shamsuddin, my IT supervisor too for helping me during my 7 weeks at *Perbadanan Putrajaya* by arranging my weekly schedule and sharing a lot of knowledge.

Next, I am glad to work with different engineer assistants for every week I have been there at *Perbadanan Putrajaya*. I am very much obliged to Mr. Ismail Nuddin, Mr. Nik Nazriariffin, Mr. Mohd Nor Hazuan, Mrs. Norliza Hud, Mr. Rozamah, Mr. Adzhar Mokhtar, Mr. Fauzi and Mr. Faisal for teaching me about maintenance and document contract.

Besides, I would like to express my sincerity to Ir. Jamal Nasir Bin Ali, Director of Facility Management division of engineering and maintenance department in *Perbadanan Putrajaya* for giving me a chance to do the IT in *Perbadanan Putrajaya* and being a good, supportive director for all the workers including me. At the same time appreciation goes to the senior engineers Mrs. Fadhlul Jannah, Tengku Marzuki and Mr. Fahmi for sharing their work experiences as an engineer and because of that I get to know more about maintenance and change my perception about maintenance. It is not that simple to work as a maintenance engineer.

Finally, I would like to extend my gratitude to my beloved family, friends and lecturers for giving me the moral and financial support during my 7 weeks as a trainee in *Perbadanan Putrajaya*.

TABLE OF CONTENT

NO	TITLE	PAGE
1	Abstract	I
