OBJEKTIF

The training aims to equip the students an introduction to the various aspects in the field of Estate Management .

The basic objectives of this exercise are as follows :

- 1 . To allow students to see and participate in practices than theory lessons learned in the lecture rooms . This will also give them an earlier opportunity to use and practice their own knowledge and judgment in performing their duties.
- 2 . To let them know through direct involvement in various aspects such as the concept of planning, organizing , staffing, directing, controlling and budgeting, to achieve the goal.
- 3 . As it is known that the work of Engineering and Management is not always based on office work but involves work on the site is likely located in a very challenging field . It is hoped that this exercise reveals the real site .
- 4 . To expose students to the organizational structure of the department or firm training and recognize the role of a particular position in the organization.
- 55 . The training also provides an opportunity to train students to write technical reports are complete . The reports they write will certainly be an important training for their future careers .
