THE ACKNOWLEDGEMENT

Alhamdulillah, first of all I would like to thank ALLAH S.W.T as finally I was able to finish my final year project paper. This task had been done with afford by myself even though a little bit problems can be settled down and I was able to adapt properly and wisely.

Besides that, big thank I'm address to my lovely advisor Shahsuzan Zakaria because without his guide, my project paper cannot be done properly like this. He always gives supports and guide to me how to do this project paper in purpose to produce a good outcome from research that have been studied. I'm already analyze and discussing about the "Determinants of Islamic Banks' Profitability Performance in Malaysia: A Panel Data Econometric Analysis."

Last but not least, I'm also wanted to dedicate a thousand of thank you to my parent who are always giving me an advance and give me a spirit to complete this task. Besides that, thank you to anyone that participates directly or indirectly in completed this report. Without their commitment and support, this thesis final year project paper would not complete successfully.

ABSTRACT

This research was aim to study on the Determinants of Islamic Banks' Profitability Performance in Malaysia. The objectives of this research are to identify internal and external determinants that influence the profitability performance of the Islamic banks in Malaysia. Other than that is to examine the relationship of both internal and external determinants towards the profitability performance of the Islamic banks in Malaysia. Another objective is to provide a relative influence between internal and external determinants towards the profitability performance of Islamic banks in Malaysia. The researcher used secondary data which is data from Bankscope site for data collection. The researcher used E-views7 software to analyse the data. From the result obtained shows that the best approach to be used in order to determine specific internal and external variables, the best solution for the Islamic banks that less profitability in Malaysia, and the best method to rank the profitability level of company.
