AKNOWLEDGMENT

Internship programme was nothing but contain so much important knowledge to me as a Building Surveyor student especially the legal aspect of a building to be followed to get a good outcome of a building. So that, this task was taken seriously by us to ensure that we understand the flow, the correct way and the vital things to be undertaken as a person that will involve in this construction field of work as we are the competent, responsible person to supervise these constructions and urban development goes smooth and clean. This content was loaded with legal aspects, safety for worker and surround also future undertaken. Students will get exposed to how reality working environment is, how to deal with other parties, how to deliver idea correctly, how to do work quickly but correctly and so on.

The completion of this undertaking could not have been possible without the participation and guidance from so many people whose name may not all be enumerated. They were helping us so much without any complaint and just sincerely helped us out. The contribution is sincerely appreciated and gratefully acknowledged. However we are not afford to reply each of them with things but we would like to express my praised, gratitude and deep appreciation to the following:

Sir Mohd Khazli Aswad Bin Khalid, the beloved and pleasant lecturer that is nonstop guiding my other friends and myself to work on this report.. He was the best among the best while guiding all of us to do this assignment proficiently. As we asked him many questions about the things we did not

CHAPTER 2		
18.	2.1. Definition of Waterproofing	13

ABSTRACT

The use of waterproofing had been the necessary item in construction. People are well known with the importance of it. So that it is cannot be taken easily on its installation, on choosing of it, and so on. Building is a shelter for us to live longer. If we are not aware of some defect on building like dampness that will affect the building structure and directly toward us, it will be no other than harming. People's fiancé, living lifestyle, emotional and physical will get affect if there is no initial act taken from getting the building a waterproofing to prevent sort of defects.

So the installation of waterproofing firstly needs to be carried out well. The neat steps taken will produce an effective functional of waterproofing. Other than that, any goods way and action also should be taken.

Long short, first chapter is basically explaining my company organisation that I have been doing my internship about 4 month a semester. How many section and department in total and its function gathered in the chapter. Each of sections and departments are playing different and specific roles. Total of staff also can be allocated. They have a leader and work together as a team to reach the main objective of JKR and to ensure the process and progress goes smooth.
