ABSTRACT

Forecasting the air pollution index has become a popular topic in recent years due to the impact of air pollution on environmental and human health. The Support Vector Machine (SVM) is not only appropriate for object classification, regression analysis and pattern recognition, it can also be used in time series forecasting. The work presented here aims to compare the accuracy of different types of the kernel function in Support Vector Machine (SVM) and to build a forecasting system for Kelantan's air pollution index for $PM_{2.5}$ using Support Vector Machine (SVM). The data used was provided by the Department of Environment (DOE) and was recorded from two Continuous Air Quality Monitoring Stations (CAQM) located at Tanah Merah and Kota Bharu. The results of the model were analyzed by using mean absolute error (MAE) and root mean squared error (RMSE). It is found that the proposed model using Radial Basis Function (RBF) kernel function with its parameters of cost and gamma equal to 100 can effectively and accurately forecast the air pollution index based on the model testing with 0.03868583 (MAE) and 0.06251793 (RMSE) for API in Kota Bharu and 0.03857308 (MAE) and 0.05895648 (RMSE) for API in Tanah Merah.

Keywords: Air pollution index, Support Vector Machine (SVM), time series forecasting, kernel function, $PM_{2.5}$

ACKNOWLEDGEMENT	iv
ABSTRACT	v
TABLE OF CONTENTS	vi
LIST OF FIGURES	viii
LIST OF TABLES	ix
LIST OF ABBREVIATIONS	x
CHAPTER ONE: INTRODUCTION	
1.1 Background of the Study	1
1.2 Problem Statement	2
1.3 Objectives of the Study	4
1.4 Scope of the Study	4
1.5 Significance of the Study	4
CHAPTER TWO: LITERATURE REVIEW	
2.1 Application to Forecast the Air Pollution	5
2.2 Previous Studies on Support Vector Machine (SVM)	6
2.3 Previous Studies on Prediction of Air Pollution using SVM	8
2.4 Summary	9
CHAPTER THREE: RESEARCH METHODOLOGY	
3.1 Method of Data Collection	10
3.2 Support Vector Machine (SVM)	10

3.3	Data Analysis	13
3.3.1	Data Normalization	15
3.3.2	Model Development	16
3.3.3	Data Implementation	18
CHAPTER FOUR: RESULTS AND DISCUSSIONS		
4.1	Data Normalization	19
4.2	Model Development	24
4.2.1	Kernel Function Selection	24
4.2.2	Parameter Selection	25
4.2.3	Fitting on Model Training	28
4.2.4	Validation on Model Testing	28
4.3	Data implementation	29
CHAPTER FIVE: CONCLUSIONS AND RECOMMENDATIONS		
5.1	Conclusion	33
5.2	Recommendations	34
