INTRODUCTION

Industrial training is a major component of the extra-curricular learning in the Universiti Teknologi Mara. The students will be placed in government department or private companies for 7 weeks to expose them to a real work environment and different from the atmosphere in the university. Often students will be faced with many challenges and problems that have not been confronted. The main purpose of this industrial training was to expose students to the real working environment when the student has been graduated from the university.

Students also have the opportunity to use all the knowledge and the theories that were related to the course that were taken by them while at the university course of industrial training and it will provide opportunities to the student to use the fruit of the creative mind for the good of the firm and indirectly for their own benefits as well. Thus, there has been this experience, maybe can help students to study in the following semester and also for the real working environment. Students also can be exposed to the ways of communicating well, expanding relationships between the partners of the workplace and the people surrounding, foster teamwork and good relation with industrial workers where this at once can cause a sense responsible to a trust and balance as well from all the aspects.

In addition, students also can improve their own weakness to improve and think more rationally in the handle which had been given by the employer. In the course of industrial training, students can assess their ability to work from the employers. The student themselves can infuse the spirit of productivity to the challenges and obstacles that lies ahead. Hopefully with the industrial training which is able to run enhance the knowledge of students to enable them to contribute more effectively towards national developments in the future and also to get a job that suits them according to the skills that they have learned. In conclusion, the real objectives of the industrial training are to:

- i. To expose students to the real working environments.
- ii. To provide students the opportunity to test their interest in a particular career before permanents commitment were made.
- iii. To develop skills in application of theory to practical work situations.
- iv. Internships will increase a student's sense of responsibility and good work habits.
- v. To builds the strength, teamwork spirit and self confidence in student's life.
- vi. To enhance the ability to improve students creativity skills and sharing ideas.
- vii. To build a good communication skill with the group of workers and learn to learn a proper behaviour of corporate life in industrial sector.
- viii. The students will be able to instilled with good moral values such as responsibility, commitments and trustworthy during tour industrial training.

BACKGROUND OF THE ORGANIZATION

The Department of Agriculture of Sarawak was formed in 1924 when a British Director of Agriculture was appointed. This was the very beginning of Government's involvement developing agriculture in Sarawak. Agriculture development efforts specifically in crop have been implemented by the Department of Agriculture starting in 1929. Since then, it has grown rapidly in terms of manpower and coverage of programs and activities. Nowadays, the Department's focus is not only in crops, but also inland fisheries, research & development (R&D), farmers' institution development, veterinary and human resource development and extension.

VISION

- ✚ Embracing R & D capability to support commercialisation of agriculture and transformation of agriculture community to achieve high income.
- ✚ A transformed high income agriculture community by 2020

MISSION

- ✚ To modernize and commercialize agriculture to continuously improve income of agriculture community.
- ✚ We strive for R & D research support services to support commercialisation of agriculture and improve income of agriculture community.

INDUSTRIAL TRAINING ACTIVITIES AND PROGRAMMES

- Department of agriculture of Betong district prepared a big meeting for the project that have been handled in year 2018 & 2019.
