## **ACKNOWLEDGEMENT**

Firstly, we wish to thank God for giving me the opportunity to embark on our Diploma and for completing this long and challenging journey successfully. Our gratitude and thanks go to our supervisor Sir Haszeme bin Abu Kasim.

Our appreciation goes to the MEC322 lecturer and the assistant engineer of the UiTM Pasir Gudang who provided the facilities and assistance during the making. Special thanks to all the student who is helping us with this project.

## **ABSTRACT**

DOTRun is a learning kit design to help student to understand the concept of general planar motion which is a sub-topic in Dynamic subjects. DOTRun which stands for dynamic on the run is easy to be brought anywhere and it helps lecturer to bring it to classes with ease. This learning kit is a result of survey conducted to student regarding the failure rate among the student regarding the courses they are learning for the Diploma of Mechanical Engineering in UiTM Pasir Gudang.
