Thesis/Dissertation Title : Comparison Between Winning and Losing Team
on Errors and Goal Scoring Patterns in Selected
Euro 2016 Match
Signature : 
Date : January 2018

ABSTRACT

Involvement of performance analysis in sport setting might help to interpret the performance indicators to be more meaningful such as number of goals, number of total shot, number of passing, number of intercepting, the overall possession for the team and many more. This study aims to determine the errors, areas containing errors and the goal scoring pattern for winning and losing team in EURO 2016 match. Thus, a total of five matches was selected starting from quarter final until final match of EURO 2016, draw match was excluded and match were analysed by using Dartfish Easytag software. A significant difference between winning and losing team were reported on goal scored inside penalty box, goal scored at area goal post D and middle attacking zone area. It might due to the player was more calm and comfortable while making the shot inside the penalty box and area D of the goal post was far from goalkeeper reach so that, striker can score goal more easily.

Keywords: performance analysis, errors, goal scoring patterns
