## **ACKNOWLEDGEMENT**

The internship opportunity I had with Pemanca Amat Tuah and Anak-Anak Company, was a great chance for learning and professional development. Therefore, I consider myself as a very lucky individual as I was provided with an opportunity to be part of it. I also grateful for having a chance to meet so many wonderful people and professionals who led me through this internship period.

Bearing in mind previous I am using this opportunity to express my deepest gratitude and special thanks to Mr. Rosli bin Amat, my supervisor during the practical, who in spite of being extraordinarily busy with the duties, took time out to hear, guide and keep me on the correct path and allowing me to carry out my project at their esteemed organization and extending during the training.

I express my deepest thanks to Mdm. Siti Zubaidah bin Hashim as my practical training coordinator, for taking part in useful decision and necessary advices and guidance and arranged all facilities to make life easier. I choose this moment to acknowledge her contribution gratefully.

I would like to express my gratitude towards my members of Pemanca Amat Tuah and Anak-Anak Company for their kind co-operation and encouragement which help me in completion of this report. Finally, I would like to thank my parents for always be there for me and helping me by being supportive and giving advices.

## **ABSTRACT**

The practical title that I choose is how the construction process of *Perumahan Rakyat Miskin Tegar* Project (PPRT) to be done. This case study is to make this practical training report based on experience that review on this construction project along the 2 months in this company. For the format of practical training report are divided into several sections, which are company background, case study background, comment, suggestion, recommendation and conclusion. Based on this experience either on site or in the office, the condition report on this construction project is complicated especially during on site, there are many of obstacles that interfere our survey during on site such as unpredictable weather and the disruption by society which trying to capitalize during survey. However, it is not too hard to make record and understood. There are many methods and process to do condition report for this construction and it is up to the client need or the company's format. In conclusion, construction project gives impact on our profession, the construction project of building has proved highly effective in improving maintenance.
