ABSTRACT

The natural rubber plantation sector is labour intensive. The employee turnover problem has affected the business performance of Hamid Sawmill Sendirian Berhad in Johor, Malaysia. The purpose of this applied business research is to investigate the influences of engaging leadership, working conditions, and reward and recognition on employee engagement to help the company reduce employee turnover. Data were gathered from 50 workers of the company through a survey approach using a self-administered questionnaire. The collected data were analyzed using multiple regression analysis. The proposed regression model integrates a framework that has previously been independently considered in employee engagement literature. The findings highlight that all input variables: engaging leadership, working conditions, and reward and recognition had significant positive influences on employee engagement. The most influential factors of employee engagement are reward and recognition. The present study helps the top management to improve employee engagement. The emphasis on employee engagement factors will help the company formulating effective organizational policies and practices to reduce its employee turnover. The findings also provide the company ideas to develop a competitive advantage in the rubber plantation industry. This research could be a reference for other related companies, and it also directly contributes to the body of academic knowledge, primarily involving workers in the plantation industry.

ACKNOWLEDGEMENT

We are very thankful to God for the health and strength bestowed upon us to complete this study even in a limited time frame and busy work hours. We would also like to thank the family members who have been so supportive of us. This study is a manifestation of guidance from Assoc. Prof. Dr. Saridan bin Abu Bakar and Dr. Hj. Zamri bin Miskam, who gave us much guidance throughout this study. Indeed, only God can reward your good deeds in helping us complete this study.

CHAPTER ONE: INTRODUCTION	1
1.1 Preamble	1
1.2 Background of Research.....	1
1.3 Background of Industry and Company.....	3
1.4 Academic Construct	7
1.4.1 Situational Analysis (SWOT Analysis)	9
1.4.2 Problem Statement.....	12
1.4.3 Research Framework	17
1.4.4 Recommendations (TOWS Matrix).....	18
1.5 Research Queries	18
1.6 Research Objectives	19
1.7 Scope/Delimitations of Research.....	19
1.8 Significance of Research	20
1.8.1 Hamid Sawmill Sendirian Berhad	20
1.8.2 Industry Players of Natural Rubber	20
1.8.3 Body of Knowledge	21
1.9 Organization of Research	21
CHAPTER TWO: LITERATURE REVIEW	22
2.1 Preamble	22
2.2 Employee Engagement	22
2.3 Analysis and Critique of Employee Engagement Construct	25
2.4 Engaging Leadership and Employee Engagement	26
2.5 Working Conditions and Employee Engagement	28
2.6 Reward, Recognition, and Employee Engagement	31

2.7	Research Hypotheses.....	34
CHAPTER THREE: RESEARCH METHODOLOGY.....		35
3.1	Preamble.....	35
3.2	Research Design.....	35
3.2.1	Purpose of Research.....	35
3.2.2	Type of Investigation.....	36
3.2.3	Research Strategy.....	36
3.2.4	The Extent of Researcher Interference.....	37
3.2.5	Study Setting.....	38
3.2.6	Unit of Analysis (Population to Be Studied).....	39
3.2.7	Time Horizon.....	40
3.3	Measurement Procedures.....	40
3.4	Sampling Design.....	44
3.5	Data Collection Method.....	45
3.6	Plan for Data Analysis.....	47
3.6.1	Feel for Data.....	48
3.6.2	Data Goodness.....	49
3.6.3	Hypothesis Testing.....	49
3.7	Limitations of the Research.....	51
CHAPTER FOUR: FINDINGS AND DISCUSSION.....		53
4.1	Preamble.....	53
4.2	Internal Consistency Reliability (The Cronbach's Alpha Test).....	53
4.3	Descriptive Statistics.....	54
4.4	Hypothesis Testing.....	63
4.4.1	Pearson Correlation.....	63
4.4.2	Multiple Regression Analysis.....	65
CHAPTER FIVE: CONCLUSION AND RECOMMENDATIONS.....		68
5.1	Preamble.....	68
5.2	Conclusion.....	68
5.3	Recommendations.....	69
