ABSTRACT

National Sport Complex is centre where all sport events for the Commonwealth Games will be held there. The complex which is built for, the purpose to accommodate athlete all over the Commonwealth Countries. It is currently under construction and expected to be completed by 1997 that is a year before Commonwealth Games. For the time being the site of the project is not occupying with the residential area. However the surrounding area is going to be developed with residential and Taman Teknologi . NSC going to be one heavy traffic point on the time Commonwealth Games is held there. Three major road access going to be built to overcome the future traffic problem. The proposed of Seremban Kuala Lumpur Highway, Puchong Highway and the proposed Shah Alam Highway will be constructed to alleviate the heavy traffic problem. The integration of the public transport system will facilitate the movement of people to NSC. So this thesis concern on the public transport system access to the NSC and the feed back on the proposed public transport system access to NSC.

ACKNOWLEDGEMENT

I would like express my utmost gratitude to Dr. Rosli Nekmat, Head of Transportation Planning Department, Pengurusan Lebuhraya Berhad for giving me the permission to do my Industrial Attachment with his department.

Special thanks to my supervisor Mr. Ahmad Ridzwan Rabu in Transplan for his willingness to sacrifice his time and sharing of ideas in order to complete this thesis. My thanks to Puan Sabariah Jemali, my thesis advisor whom without her help, patience and ideas, I would have not be able to complete my thesis.

To Dr. Leong Siew Mun, Head Of Transportation Planning Department in Dewan Bandaraya Kuala Lumpur for your hospitality during my interview session. Not forgetting all respondents who are willing to cooperate during the survey. Lastly, 'gracias' to the staff of Transportation Planning Department of Pengurusan Lebuhraya Berhad who made my Industrial Attachment so much meaningful and my classmate for their continuous support.
