Tuan/Puan,

TAJUK PROJEK PENYELIDIKAN DANA KECEMERLANGAN : "A PRELIMINARY STUDY ON FACTORS THAT INFLUENCE SKIN CHARACTERISTICS OF UITM'S STAFF AND STUDENTS"

Dengan hormatnya perkara di atas adalah dirujuk.

Sukacita dimaklumkan bahawa Mesyuarat Jawatankuasa Penyelidikan Dana Kecemerlangan telah meluluskan cadangan penyelidikan yang telah dikemukakan oleh puan bertajuk di atas dengan syarat-syarat seperti berikut :

- i. Tempoh projek penyelidikan ini ialah 1 tahun, iaitu bermula **15 Mei 2008** hingga **15 Mei 2009**.
- ii. Kos yang diluluskan ialah sebanyak **RM10,000.00** sahaja.
- iii. Semua pembelian bahan/peralatan adalah diminta agar tuan/puan mematuhi prosedur perbendaharaan di mana pembelian melebihi RM 500.00 hendaklah mengemukakan sebutharga dan borang analisa harga.
- iv. Pihak tuan/puan dikehendaki mengemukakan laporan prestasi secara ringkas pada bulan Disember 2008 sepanjang penyelidikan Tuan/Puan berjalan.
- v. Tuan/Puan perlu menandatangani Borang Perjanjian Penyelidikan dengan kadar segera kerana penggunaan geran hanya dibenarkan setelah perjanjian ditandatangani.

Tarikh : 15 Julai 2009
No. Fail Projek : 600-IRDC/ST/DANA 5/3/Dst (2/2008)

Ybhg Prof,

LAPORAN AKHIR PENYELIDIKAN “A PRELIMINARY STUDY ON FACTORS THAT INFLUENCE SKIN CHARACTERISTICS OF UiTM STAFFS”

Merujuk kepada perkara di atas, bersama-sama ini disertakan 2 (dua) naskah Laporan Akhir penyelidikan bertajuk A Preliminary Study on Factors that Influence Skin Characteristics of UiTM’s Staff dan 1 (satu) salinan softcopy dalam bentuk cakera padat (CD) oleh kumpulan penyelidik dari Fakulti Kejuruteran Elektrik untuk makluman pihak tuan.

Sekian, terima kasih.

Yang Benar,

SAIFUL IZWAN SULIMAN

Ketua,
Projek Penyelidikan

ABSTRACT

This study is a preliminary stage of further researches that identifies the factors that influence skin characteristics of UiTM's staffs based on experiments conducted in a lab. There is a serious concern among a population in Asia about possible adverse biological effects of environment exposure, lifestyle and food pattern. In this project, the effects of the factor on human skin are discussed, the skin topography was measured such as skin roughness, moisturize, elasticity, smoothness and transepidermal water loss were studied. Hundred staffs were selected to undergo a skin test and answer relevant questions. The skin tests were conducted by using Visionscan® VC 98 and the software SELS and Cutometer® MPA 580. From the skin tests, the characteristics of the skin of these subjects were determined and the factors that influence its conditions were recognized by analyzing the questionnaires. We found that from the several selected factors mentioned in the questionnaires, only two factors which are gender and supplement intake influence and affect the skin characteristics of the participants (UiTM's staffs). Meanwhile, other selected factors such as amount of water consumed, type of soap used, working environment and cosmetic product applied do not show significant effect or in other word do not affect and influence the skin characteristics of the subjects.
