ACKNOWLEDGEMENT

Alhamdulillah. Firstly, I am very grateful to Allah because He gives me a good health and can successfully completed the industrial training that compulsory to each student in the last semester (semester 6). Next, I would like to thank to Dimara Group of Companies that willingly accepted me to have my industrial training together with other trainees and staffs.

I always remember and thought without people around me who support and help me, I will not succeed in accomplishing my industrial practical training. So, I would like to take this opportunity to express my gratitude and deep appreciation to who guide and help me at the site, Mr. Masrizam Marsikin as my supervisor at site. Without him, I will not know what I should do at the site. The guidance and help given by him from time to time shall bring me a long way in the journey of life.

To staff member and workers in Dimara Construction, I am thankful for the valuable information provided by them in their respective fields. I am also grateful for their cooperation during the period of my task. Furthermore, I am also thanked to Madam Intan Bayani Zakaria, lecturer of University Technology Mara (UiTM) Seri Iskandar who in charge for my Industrial Training and have given me a lot of information during the task of the training.

Last but not least, I would like to thanks my beloved parents for their understanding, moral support and strength from the beginning to the end of my industrial training and also to all my friends at UiTM and also in the company. Without helps from all of them, I think I may face difficulties during completing this project. I really hope that my industrial training report will be accepted. Thank you.
