ACKNOWLEDGEMENT

It is always a pleasure to remind the fine people in the Gemilang Maintenance Services Sdn. Bhd. for their sincere guidance that I received to uphold my industrial training as well as theoretical skills in maintenance works.

Firstly, I would like to say thanks to my family for allowing me to take Diploma in Building Survey. Thank you also to them for always supporting me and all the tolerant that you gives me for all this years. Next, I would like to acknowledge the following people for their supports. I would like to special thanks to my academic supervisor, Mr Mohd Nurfaisal Bin Baharuddin for the supervision and guidance that he gave which is truly help the progression and smoothness in my industrial training report. Thank you also to my industrial training supervisor from Gemilang Maintenance Services Sdn. Bhd, Mr Shamsul Bin Muhammad Khairudin for giving me opportunity did my practical training at Gemilang's.. I impress my gratefulness to all technicians in Gemilang Maintenance Services Sdn. Bhd. for willing to teach me how to do maintenance and share their knowledge during industrial training. Thank you for all your guidance and supported me in every possible ways. I would like to thank you to all my friends for help and encouragement in finishing the work and task givens. Finally I apologize to all other unnamed who helped me in various ways to have a good training.

ABSTRACT

Air Conditioning is just what the name suggests, air that have been conditioned to meet demands of the occupants of home, office, factory or any internal space. Air conditioning provides and maintains internal air conditions at a set temperature, regardless of the time of the year, the season or the country of residence.

In this report, it will be focus on centralized air conditioning system. Central (ducted) air conditioning offers whole-house or large-commercial-space cooling, and often offers moderate multi-zone temperature control capability by the addition of air-louver-control box. Besides that, it will show the maintenance work om air conditioning system especially at the big structure and a big air conditioning system like centralized air conditioning system.
