ACKNOWLEDGEMENT

First of all, I praise Allah, the almighty for providing me this opportunity and granting me the capability to proceed successfully. I would like to offer my sincere thanks to all of them throughout the training period starting from 1st March 2018 until 28th June 2018.

I want to express my deep thanks to my esteemed supervisor lecturer Madam Aida Affina Binti Abd Ghani for the trust, the insightful discussion, offering valuable advice, for your support during the whole period of training and especially for your patience and guidance during the discussion process.

My deepest appreciation goes to my supportive Project Manager Mr. Wan Hanapi Bin Wan Hassan for his excellent advises, detailed review during the preparation of this report and his friendly assistance with various problems all the time, especially showing me and sharing with me his experiences and knowledge about the Project Management and Construction Management. Not to forget to my Supervisor Mr. Asri Bin Ismail for guidance during practical session.

In conjunction, I would like to give my gratitude to Perbadanan Kemajuan Iktisad Negeri Kelantan (PKINK) and to Binaraya PKINK company for the cooperation, comfortable services and acceptance in bringing me in to learn and gain knowledge as much as it could and experiences in facing the real situation of construction work during the training period. Thank you.

May Allah bless of you for your willingness to help me.

ABSTRACT

Quality Standard in construction industry consists of three main work which are Structural work, Architectural work and Mechanical work. A quality construction project should be carry out by expertise project team in handling the quality standard assessment and should be applying in building work An Architect, Main Contractor, Quantity Surveyor, M&E Consultant and C&S Consultant should be take any Quality Standard Assessment for building work as their guidance to carry out any building work. Nowadays, this assessment is rarely use due to the attitude such as quickly going to be finished a project and to get more profit from a project.

During practical period in Kelantan where the site is specifically located in Rantau Panjang under the Binaraya PKINK company, the construction works are fully done through the structural work since the practical started. What is only left are finishing work and cleaning work. Thus, it is a constraint and limitation to develop the knowledge in construction.
