ABSTRACT

History has literally been dug up at the confluence of the two rivers that inspired the name of Malaysia's capital Kuala Lumpur. A staircase adjoining Masjid Jamek, long forgotten in the face of modernization and development, has been unearthed after works for the River of Life project in the area commenced. At a glance, it seems a disconnected structure but further digging showed there was more to it than it seems. Malaysian Institute of Architects (PAM) heritage conservation committee member and architect Mariana Isa said the staircase was part of the original mosque design from more than a hundred years ago. y. However, based on previous studies, maintenance is always been neglected and not become the main activity in managing and protecting of this valuable and non-replaceable asset. Therefore, the main objective of this study is to identify construction of Grand Staircase, Masjid Jamek, issues and problems affecting the implementation of maintenance in dealing with heritage Grand Staircase, Masjid Jamek.

ACKNOWLEDGEMENTS

My deepest thanks are directed to my practical training lecturer, Mr. Sr Mohd Dzulkarnean Bin Sudirman and Mr. Nor Amin Bin Mohd Radzuan of University Technology Mara, Seri Iskandar, Perak (UITM). Throughout the study, they had giving me many advices and support. Besides that, I would like to thank them for helping me revised my thesis throughout, giving valuable comments on this thesis, and correct me on whichever part that I had made mistake.

Besides that, I would like to thank my course mate and for their contribution in this study. Without their assist, my work will not be that smooth.

In addition, I would also like to express our gratitude to my loving parent for their patience and support. I appreciate help from everyone who had contributed to the successful completion of this project.
