EASY FAST SIMPLE

CHAPTER 1.0 - PRODUCT DESCRIPTION

1.1 Introduction

Nowadays, too many patients come to hospital especially emergency department to get the treatment. As a procedure, patient has to undergone triage for record the vital sign. Vital sign is the reading of height, weight, temperature, blood pressure and level of pain score. The ideas come for our team to produce a high-end technology product which very useful to check vital signs at triage. The product is TriagezyGo.

1.2 Purpose of development

TriagezyGo can automatically checking temperature, height, weight, and blood pressure and pain score of patients at only one station less than 5 minutes. This help to reduce the timeframe of patient waiting at triage in Emergency Department. Normally patients have to wait more than 30 minutes just for checking vital sign before get the necessary treatment. However, with TriagezyGo it will overcome the issues of delayed treatment and waiting time at Emergency Department. Besides, this product also overcome the issues short of staff at triage. It can reduce the workload of staff emergency department and less documentation as the result is printed. Less contact between patient and staff can reduce nosocomial infection and keep hygiene.

1.3 Product Concept

TriagezyGo is for all triage at Emergency Department for every hospital in Malaysia include government and private sector.
