ABSTRACT

The purpose of this research is to examine the prevalence of media violence among the teenagers. The importance of this present research as well as the research's goal to ensure the research on the prevalence of media violence among the teenagers. The survey will find that whether the teenagers accept of media violence and more likely to consume media violence but this research does not only find the factor, characteristics and commonness of media violence could be the cause of aggressive behaviour but however, in nature, both consumption of media violence and aggressive is related to each other. By nature, the participants will find that the research assistant are not to be recommended to rehire for a future job but for those the participants who watched violence films were to give more negative comments or feedback towards the research assistant that is compared with the ones who watched non-violence media but this research cannot be justified as the findings of the violence behaviour.

ACKNOWLEDGEMENT

First of all, I would like to express my deepest appreciation to all those who contributed to completion of this research. A special thanks to my lecturer, Dr. Muhammad Hakimi Tew Abdullah who contributed in stimulating suggestions, guidance and advice in preparation of this research. With Allah's will, I have completed this research entitled "The Prevalence Of Media Violence Among The Teenagers".

Alhamdulillah to Allah S.W.T because I finally manage to finish my research on the proportion of time given. Based on my learning, this particular subject is quite tough but also interesting in developing the research.

I also like to convey deep appreciation to all respondents for their cooperation in answering the questionnaire. Lastly, thank you to my family for their moral and financial support, friends and all respondents for their patience during preparation of this research. These commitments enabled I to complete this report on time.
