ACKNOWLEDGEMENT

First of all, I would like to express my deepest gratitude and praise to Allah S.W.T for the patience and strength bestowed upon me in completing this academic project.

I would also like to convey my sincere appreciation and thanks to my advisor, Prof Madya Mak Som Bin Sarakan for his endless guidance, encouragement, patience, comments and ideas along the process of completing this academic project.

My greatest thanks also go to the students of B. Ed. TESL from UiTM Dungun, Terengganu for their cooperation in helping me to get the data needed to complete this study.

Last but not least, I would like to extend my appreciation and indebtedness to my family and fellow B. Ed. TESL friends for their continuous support and care in finishing this academic project.

ABSTRACT

This study attempts to investigate the use of grammar learning strategies on 56 participants from UiTM Dungun, Terengganu. There are five grammar learning strategies focused in this study namely the memory strategies, cognitive strategies, compensation strategies, metacognitive strategies and social strategies. The objective of this study is to find out whether adult learners are using the grammar learning strategies and which grammar learning strategy is most commonly used by the adult learners. Other than that this study was also intended to investigate the differences between teachers and non teachers in the use of grammar learning strategies and also the differences between the gender of the adult learners in the use of grammar leaning strategy.
