ACKNOWLEDGEMENT

IN THE NAME OF GOD THE MERCIFUL AND BENEFICENT

Alhamdulillah, praise to Allah for giving me the strength to complete this paper, my family for their never-ending support and prayers. My appreciation are also due to the all staff of production department in **Matsushita Electronic Devices (M) Sdn Bhd (MEDEM)** for their willingness to be interviewed and providing me with valuable information and has made this all possible.

I am also indebted to the following people, my advisor Puan Zubaidah Zainal Abidin for her guidance, advice and comments. Thank you for running through the sample and providing constructive suggestion to my work.

Having now been through the ordeal of writing a first project paper, my deepest gratitude goes to my roommate for helping me keep my sense of perspective, by kind words and often by patience.

Last but not least, I would like to express my special thank to En. Khairul, En. Rosmadi Ghazali and Miss Rozita Ramli for their support and giving me the right advice in the right dose at the right time in order to completed this project paper

ABSTRACT

Introduction of this report is based on the assesment of an effectiveness and difficulties of JIT techniques face by Matsushita Electronic Devices (M) Sdn Bhd in Shah Alam which cover Purchasing and Production Department. The company is a Japanese company who produce microchip component locally and oversea.

The implementation of JIT manufacturing techniques have been written and discussed by several accounting experts. The slow acceptance of JIT have caused manufacturers to lost their competitiveness. Most of the techniques involved changes in the factory operations, relationships with suppliers and workers. The aims of the JIT are to produce the required items at the required quantity and qualities at the precise time. This mean that the company manufacture just enough to meet the market demand.

JIT always stress on the elimination of waste, good quality product and on time delivery. JIT always target for on time delivery service to their customer. Therefore any problem occurred in the production should be eliminated to ensure that the products are produced smoothly and achieve the target on time. The employees participation and suppliers involvement are very important in order to achieve the company target.

The paper focus mainly on the effectiveness and difficulties occurred in Matsushita Electronic Device (M) Sdn Bhd. Since JIT always focus on elimination of waste, good quality product and on time delivery services, this paper will discuss in detail how these situation managed by the management of Matsushita which could lead better productivity and who are involved in implementing JIT system in this company.
