Executive Summary

This report is about how my groupmate and I created our own face mask business as a big company. Our company's name is Face Elegant and was registered on 21 January 2020. We started our business 30 days after the date of registration. There are a total of 5 employees working under this company that helped in succeeding this business. It is an online business that we run by ourselves using an online platform to promote and sell the product to the customers. There are a lot of methods we used to advertise the value of our product so that the customer will consider buying this product. Our company is more focused on designing an affordable and more appealing pattern of face masks. Our mission is to provide a comfy and eco-friendly face mask to customers. In addition, our face masks can prevent the spread of the disease while looking trendy and stylish. These face masks fit so well with both genders because we have a unisex design and are also different from face masks created by other companies because we have a unique design specialize only for women based on their request.

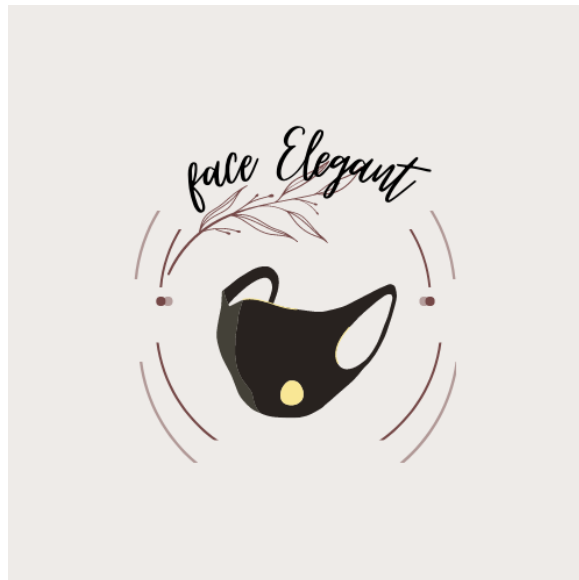

1.0) BUSINESS DESCRIPTIONS
