CHAPTER 1

INTRODUCTION

1.0 Introduction

In order to meet the challenges of globalization, Malaysia needs to have entrepreneurs highest competence in various disciplines such as ICT and thinking skills scientific, critical, innovative and creative. Development of Science and Technology sophisticated is the leading resource that will put Malaysia on the status that can compete with other countries in line with the era of globalization, knowledge economy and ICT. Therefore, our government is very concerned about the development of world of technology-based programs especially.

A society that has many entrepreneurs is the community best (Ab. Aziz, 2003). This is because entrepreneurs are individuals who are most dynamic, creative and innovative. They are available for dealing with uncertainty through creativity and determination to achieve success. This spirit has caused them to see tomorrow with the full opportunity and confidence to seize the opportunity. Therefore, the entrepreneur must create and integrate into areas, to improve competitiveness by providing more options to the well-being of their community.

The entrepreneur is identified as the agent to changes in the world economy that we see today (Lambing and Kuehl, 2000). They have shown that prior statement certified by Zenkin (1981) that without socio-economic development activities of the entrepreneurs in one country may not
