Acknowledgment

In the name of Allah, with high gratitude to Allah S.W.T. who gave me the ideas and physical strength in preparing final year project. Alhamdulillah, after what I have faced while doing this research, finally I am able to complete this works and I am really hope this research will be useful to all parties in the future.

First and foremost, I would like to express my appreciation and acknowledgement to my Supervisor, Sr. Nor Amin Bin Mohd Radzuan for his guidance, supports, comments, contribution of ideas in preparing this final year project. Her dedicated supervision has made things possible and gives me a great experience.

Deepest thanks also given to Mr. Roslan Bin Zamzuri, Mr. Haji Wan Abdullah Wan Abdul Kadir, and Mr. Hj. Yusuf Bin Musa as the principal of the private owned orphanage on three places of my case study for spending their time for interview. In addition, the appreciation also given to the private owned orphanage workers of the three place of my case study for their helping in answering my questionnaire.

Furthermore, I would also like to extend my sincere and heartness thanks to my beloved family, especially my late father and mom for giving me full of support, helping me a lot in completing this project.

Finally, I would also like to thank my friends, especially AAP229 D6 class especially my partner Nik Hanif Nik Razif because willing to help find the information that I do not know and struggle to help me. A very unforgettable good deed that has contributes to finish this final draft of research. Finally, I would like to thank all those involved directly or as to help me successfully complete this research.

I'm hoping my supervisor, Sr. Nor Amin Bin Mohd Radzuan that satisfied and happy to with the work that I do this. Thank you.

Abstract

In Malaysia, the fire cases involving the private owned orphanage is keep increasing time to time. Fire will cause injury, loss of life and loss of property. Most people do not alert the important of fire safety management in our life. Proper implementation of fire safety management is a key to providing total fire safety. This study was carried out to measure the level of awareness among the employee on the fire safety management. Other objective of this case study is to identify the hazards of private owned orphanage towards the employee. This study was conducted on three place of private owned orphanage. It is because for easing in compare of three place for the case study. The respondent is only stressed on the employee on three private owned orphanages with consisted of 85 respondents. All the employees in the department were included. The tools used to collect the data were an informal interview, observation methods, and questionnaire. The collected data was analyzed by percentage and mean. The study reveals that a majority of the respondents were knowledgeable and alert about the fire hazards and safety measures. Results of this study were to identify the level of awareness of the employee on the fire safety management aspects.
