ACKNOWLEDGEMENT

Assalamualaikum,

First of all, I would like to praise to Allah s.w.t for giving me strength and chance to complete this report completely. I used full strength to gather all the information about this practical report. Alhamdulillah, I am very much satisfied with the information that I had gained. Special thanks to K&P Cove Consultancy Sdn Bhd and the lecturers because giving me the opportunity to have my internship at K&P Cove Consultancy Sdn Bhd located at No. 9-2, 2nd floor, JalanPuteri 2/5, Bandar Puteri, 47100 Puchong, Selangor.

Secondly, I want to thank to all staffs and also my supervisor, Mohamad Azharul Azlan, for giving enough lessons and knowledge during my intern at K&P Cove Consultancy Sdn Bhd. Without their help, this report will not be completed.

Thirdly, I would like to thank to the lecturer, Sr Cik Mohd Faisal Bin Baharudin and Sr Dr Fadzil Bin Mohd Yasin who always gave me support and giving more information to complete the report perfectly. Thank you so much for all the assist and advice given to me for completing this report. It is quite hard for me at the beginning to understand the needs to complete this assignment. With the guides, I have successes in completing this report. I am also grateful to my parents for giving me support in terms of money, advice and moral support.

Lastly after finishing this project, I am very happy because I got a lot of information from this project and first time I went to do my internship. Without the help of all the persons I had listed before, this report couldn't be finished on time. Last but not least, I hope all the information that I gained can be used in the future.

Thank you.

ABSTRACT:

The practical task that I chose is on how the process and what is the purpose of dilapidation survey. I chose this as my case study to make this practical training report based on my own experience that I had review various types of survey along the 4 months practical in this company. For the format of practical training report are divided into several sections, which are company background, case study background, comment, suggestion, recommendation and conclusion. Based on my experience either on site or in the office, the dilapidation report is complicated especially during on site; there are many of obstacles that interfere our survey during on site such as unpredictable weather and the uncooperative society during the survey process. However, it is not too hard to make record and understands the process of dilapidation survey. There are many methods and process to do dilapidation report. In this report, it contains a summary of the definition of dilapidation survey, process from starting work until sending report, the tool and equipment, method of taking record or data and the procedure on how the condition survey is conducted. In conclusion, dilapidation survey gives impact on our profession, the dilapidation survey has proved highly effective in improving maintenance or it also can prevent hazardous accidents that will occur. This survey benefits the tenant itself and also the surrounding neighbors and people.
