ABSTRACT

Alhamdulillah,

Firstly, I can completed my practical training at on time given. So, my position during my practical training as a site supervisor. It's a little bit helped me to completing my final task. Also that, it give me advantages to learn about construction management. Before this, I was learn about the theory of building which is how to maintain a building from the aspect of maintenance management, maintenance policy, maintenance strategy and financial aspect. This paper work presents the result of waterproofing installation system at services apartment 669@Almyra Residence. In the research, my interview is done during the period of 4 months training along with guide by En Khairuddin Yaakub as a Project Manager. From my researching, the result at the high rise building which is I was identify the problems that occurs during the installation work and how to overcome that problems. For conclusion, waterproofing system are important to building to prevent the internal wall from any leakage.

ACKNOWLEDGEMENT

With deep gratitude, I would like to thanks to my parents that always support me in term of finance and spirit during my practical training. Also that to my friends and people who constantly inspire and share ideas in completing this task.

Secondly, I would like to express my gratitude to the company Kenwingston SDN. BHD. for allowing me to complete my task. Also thanks to the project teammate operation department for sharing their knowledge about construction management.

Lastly, thanks to my supervising lecturer Sr Mariaty Mohd Bahari for provided tutoring and guidance in preparing this report.
