# DETERMINANT OF LOAN RECOVERY RATE TOWARDS BANKING INDUSTRY IN MALAYSIA

### NOORATIQAH BINTI AMIR 2014345655

Final Year Project Paper submitted in fulfillment of the requirements for the degree of **Bachelor** of **Business Administration (Finance)** 

Faculty of Business and Management

**December 2018** 

### **AUTHOR'S DECLARATION**

I declare that the work in this final year project paper was carried out in accordance with the regulations of Universiti Teknologi MARA. It is original and is the results of my own work, unless otherwise indicated or acknowledged as referenced work. This thesis has not been submitted to any other academic institution or non-academic institution for any degree or qualification.

I, hereby, acknowledge that I have been supplied with the Academic Rules and Regulations for Undergraduate, Universiti Teknologi MARA, regulating the conduct of my study and research.

Name of Student : Nooratiqah binti Amir

Student I.D. No. : 2014345655

Programme : Bachelor of Business and Administration (Hons)

Finance

Faculty : Business and Management

Thesis : Determinant Of Loan Recovery Rate Toward Banking

Industry In Malaysia

Signature of Student : ....

Date : December 2018

### **ABSTRACT**

Loan recovery is a topic that the researcher chooses to study due to the current issue about to recover the loan that not being paid over the due. Loan recovery is the gathering of a loan amount from a borrower in non-payment. Recovery studies employ different measures of recovery rates. One common measure is the trading price of the debt instrument approximately 30 days after default. Firms defaulting on their bank loan obligations typically enter a period of bankruptcy protection, until their finances are successfully restructured. Some firms manage to fully recover and continue operating. Other less successful firms eventually fold up, with their creditors recovering less than was originally owed to them (or nothing). Hence, modelling recovery rates for defaulted loans is crucial, particularly for banks, as their capital ratio management is a function of accurately inferring recovery rates. The objective of this study is to determine loan recovery rate toward banking industry in Malaysia. In this study, loan size, interest rate, base lending rate and gross domestic product are the important toward loan recovery rate in Malaysia. The researcher used time series data about 97 latest years from 2010 to 2018. The data were analysed by using Pooled ordinary Least Square (OLS) to evaluate the relationship between variables by E-Views 9. From the empirical study, it is shown that the loan size, interest rate, base lending rate and gross domestic product influence the recovery rate. However, the study further anticipated the addition of supplementary variables to recover the strength and descriptive power of the general model.

Keywords: Recovery rate, loan size, interest rate, base lending rate, gross domestic product

#### **ACKNOWLEDGEMENT**

Firstly, thanks to ALLAH S.W.T, the Most Gracious and the Most Merciful for giving me strength on completing this project paper. All the praises and thanks to Him for giving me the times, wills, guidance and strengths during the period of this project. Besides, this project paper will not successfully complete without cooperation from many parties. They have contributed a lots in preparing this project paper. I am thankful to many people who provide me the kind assistance or had contributed immensely to the success completion of this project paper in due time.

I wish to express my sincere gratefulness and gratitude to Madam Norsaliza binti Abu Bakar whose act as my advisor. My appreciation also goes to Madam Nur Liyana Mohamed Yousop whose act as my coordinator. Furthermore, special thanks dedicated to the staff of UiTM Johor Library as well as my fellow classmates and friends for their helps, concerns, morals and materials support. I would like to grab this opportunity to express my deepest appreciation for those who had contributed a great deal towards the completion of this project paper. I have learnt much about this subject. I wish to extend my appreciation to my family, especially to my parent for their moral support in completion this project paper. In conclusion, I am grateful to ALLAH S.W.T for his guidance and the continuous good health and wealth which without His blessed I might have not completed this project paper. Thank you.
