TABLE OF CONTENTS

CONTENTS	PAGE
SUPERVISOR’S APPROVAL	iii
DECLARATION	iv
TABLE OF CONTENTS	v
LIST OF FIGURES	vi
LIST OF TABLES	vii
CHAPTER ONE : INTRODUCTION	
1.1 Introduction	1
1.2 Background of Study	2
1.3 Problem Statement	3
1.4 Project Question	5
1.5 Project Objective	5
1.6 Project Scope	6
1.7 Significance of Study	6
1.8 Conclusion	7
CHAPTER TWO : LITERATURE REVIEW	
2.1 Introduction	8
2.2 Overview of Domain	
2.2.1 Speech Delay	9
2.2.2 Children of Speech Delay	9
2.2.3 Speech Therapy	10

	2.2.4 English Language	10
	2.2.5 Stutter	10
2.3	Overview of Research Area/Elements	
	2.3.1 Speech Recognition	11
	2.2.2 Web Application	12
2.4	Specific Description of Area	
2.5	Techniques in Area	
	2.5.1 Summary analysis of comparison techniques	12
2.6	Common Features Related to Project	
	2.6.1 Articulation Station	15
	2.6.2 Read Along by Google	15
	2.6.3 Stamura App	16
	2.6.4 DAF Pro (Delayed Auditory Feedback)	17
	2.6.5 FluencyCoach	18
	Comparison of Related Applications	
	Chosen Techniques & Features with Justification	
2.7	Summary	21

CHAPTER THREE : METHODOLOGY

3.1	Introduction	22
3.2	Research Methodology/Framework	
	3.2.1 Research Design and Methodology	23
	3.2.2 SDLC Framework	24
3.3	Problem methodology	
	3.3.1 Analysis Phase	26
	3.3.2 System and Software Design	27
	3.3.3 Implementation and Testing	27
	3.3.4 Operation and Maintenance	27
	3.3.5 Feasibility Study	28
3.4	Application Architecture	28

CHAPTER 1

INTRODUCTION

1.1 Introduction

This research, named Web Application: Therapeutic Treatment for Speech Delayed Children, focuses on the early years of children's speech development and how they articulate their words. Specifically, this research focuses on delayed speech in stuttering children as users and intends to help them via a web application to take advantage of personalized learning and to adapt to the situation being evaluated. This application(app) would aid young children by facilitating the identifying process so that appropriate intervention for their speech delay may be provided. With the deployment of this application, speech delay and early identification of speech delayed children may be aided and these children can receive early diagnosis and assistance from experts or adults around them.

This chapter summarizes the project, beginning with the context and progressing through the issue description, project questions, project objectives, scope, and importance.

1.2 Background of the study

Early childhood speech delay (SD) is a disorder in which a preschool child's speech development is slightly slower than that of other children of the same sex and age (Fan et al., 2021). As described by Pietrangelo (2019), speech delay is when a child fails to meet normal speech milestones due to various factors that may impede children
