Abstract

Most of talk in this thesis report is research about the Issue of Short Circuit in Perak Housing. This research is begin by the cases of short circuit happen in many old housing that focusing on wiring maintenance. This short circuit will be carry out the successfully of the objective by make a questionnaire and validation data on the officer that has knowledge and experience on this topic. All in this report must be containing into the aim of objective to make the body report is still in the topic research. The flow of this report is elaborate about the causes, impact and solution of short circuit happen. Before that it will be show the introduction about the wiring, electrical and services that have in building, specifically on housing to make the reading more understanding the source wiring. By that intro, the research will go through focusing into the aim of this research. Where it will talk about the analysis of this research at three placed that represent to another district of this Perak. After the analysis is done, the data will be finding to filtered by choose the answer of objective.

Acknowledgement

Assalamualaikumwarahamullah. In all of this research is done by helping with all my friends, my classmate, and to the all staff in BOMBA Perak that giving me the knowledge with their experience and also their knowledge to help me get the information. Not to forget to my supervisor Sr. Wan Samsul Zamani Bin Wan Hamdan that all the time to complete this research helping me in every part to get the successfully research. Without the guide by them, this research can't be more difficult and more time to complete it. Especially to my parents that always make me strength to done my thesis and also support me until the end of my life. Big thanks to them and nothing can repay what they do to me until now.
