

# ITEM INVENTORY MANAGER

MOHAMMAD FAIZ BIN MOHAMAD ZAMRI  
NUR MUHAMMAD BIN SALIM

A project report submitted to the Faculty of Electrical Engineering,  
Universiti Teknologi MARA in partial fulfillment of the requirements for the award  
of Diploma of Electrical Engineering.

FACULTY OF ELECTRICAL ENGINEERING  
UNIVERSITI TEKNOLOGI MARA  
MALAYSIA

SEPTEMBER 2015

## **ACKNOWLEDGE**

First and foremost i would like to thank God Almighty for being my strength in times of needs and my place of comfort. Surely with God's help, everything is possible even the impossible.

We would like to express our deepest appreciation to all those who provided us the possibility to complete this report. A special gratitude we give to our final year project supervisor, Cik Farah Yasmin Binti Abdul Rahman for her guidance, suggestions and feedbacks for this project. She provided us with never ending encouragement and support to finish this project.

We will cherish the contributions, supports and encouragement of above people in our heart forever. Without the contributions from any of these people and of course with God's permission, we believe that we will not reach our objective. Thank you very much again and all of people above will always be remembered.

## **ABSTRACT**

To realize this project, extensive research and study have to be done on matrix keypad, Arduino Uno Microcontroller, LCD display and interface circuit. The purpose of this project is to design an inventory manager, which the code data can be saved in Arduino Uno Microcontroller and monitor using LCD module interface. So, the objective of this project is to develop and design a circuit which consists of the combination of hardware such as matrix keypad, Arduino Uno Microcontroller and LCD module to produce a system that have input and output signal. The first parts of this project are discussion with the supervisor which is held in every week, to create and form works the circuit. Final Year Project 1 are mainly the embodiment of our real project which are only consist of planning and construct the circuit use for Final Year Project 2. The second parts of this project are about teamwork with partner which is really important to ensure the works were done due the date. In progress of this project, the works are given out equally. This project can be commercialized because it is cheap to build, portable, will fasten work and will be more precise

## TABLE OF CONTENTS

CHAPTER	TITLE	PAGE
	APPROVAL SHEET	iii
	DECLARATION OF ORIGINAL WORK	iv
	ACKNOWLEDGEMENT	v
	ABSTRACT	vi
	TABLE OF CONTENTS	vii
	LIST OF FIGURE	ix
	LIST OF TABLES	x
1	INTRODUCTION	
	1.1 Background Study	1
	1.2 Problem Statement	2
	1.3 Objectives	2
	1.4 Scope of Work	3
	1.5 Project Contribution	3
2	LITERATURE REVIEW	
	2.1 Introduction of Inventory Manager	4
	2.2 Reason of Making an Inventory Manager	5
	2.3 How Does it Works?	6
	2.4 Components Used for this Project	7
	2.4.1 Microcontroller	7
	2.4.2 History of Microcontroller	8
	2.4.3 Concept Operation of Microcontroller	10
	2.4.4 Arduino Uno Microcontroller	10

<b>CHAPTER</b>	<b>TITLE</b>	<b>PAGE</b>
	2.4.5 Atmega328	12
	2.4.6 Liquid Crystal Display	16
	2.4.7 4x4 Matrix Keypad	19
<b>3</b>	<b>METHODOLOGY</b>	
	3.1 Flow Chart of Methodology	22
	3.2 Flow Chart of Project	23
	3.3 Experimental Setup	24
	3.4 Equipment and Components	24
	3.4.1 Arduino Uno Microcontroller	26
	3.4.2 Liquid-Crystal Display (LCD)	27
	3.4.3 Matrix Keypad	28
<b>4</b>	<b>RESULT AND DISCUSSION</b>	
	4.1 Result and Discussion	29
<b>5</b>	<b>CONCLUSION</b>	
	5.1 Conclusion	36
<b>6</b>	<b>PROJECT PLANNING</b>	
	6.1 Final Year Project 1	38
	6.2 Final Year Project 2	39
