JOMSOLAT

Nowadays, we are currently affected by the dangerous Covid-19 virus. This covid-19 virus is getting widespread in Malaysia because people don't care about this virus. In this respect, many people have wanted to invent a product that can be used to reduce the spread of the virus. In comparison, products that preserve social distance are often created to make people safer in the public. JomSolat is a product of social distancing while praying in the mosques and suraus to ensure that the community adheres to the SOP of the Mosque by establishing a social distance.

This product can be used during the pandemic while at mosque and surau. This product is for people who visit the mosque and surau who want to pray more peacefully and comfortably. This product works very well because it makes people be more vigilant about social distance between them, especially for people who often go to mosques and surau during Friday's prayers in large numbers. This product has allowed people to pray more peacefully and comfortably in the mosque and surau. Moreover this product for social distance has several types produced for certain locations or particular sites, such as public areas, public transportation or shopping malls.

This product uses a sliding concept. This product is long-lasting and easy to use. This product is specially made for those who always go to the Mosque and Surau to pray. In addition, this product guarantees that they retain their social distance when doing activities in the mosque and surau. This product has two colour combinations, namely red and blue.

The colors show the meaning and direction that people need to follow, which is, red means that the area is banned from being entered while the area permitted to be occupied is blue. In addition, this product allows

people to sit to perform their prayers using simple arabesque patterns on the top and edges of the mark like the pattern on the prayer mat.

The pattern is inspired by the arabesque pattern, which is to apply elements of Islamic art through the application of repetition patterns. The color blue is chosen for the prayer area because the meaning of the color blue in Islam is peace and trust. While the color red was chosen because most warning signs use the color red. In addition, the color red is also an interspersed color and is suitable for areas that are not allowed to sit or pray. This product can also be used a lot of times and is not easily damaged.

The benefit that people can get by using this product is that people can reduce the occurrence of this covid-19 infection to others intentionally or unintentionally. In fact, people will feel more relieved and able to concentrate while performing prayers. Another benefit you may find while using this product is that you do not have to worry about missing markers.
