ABSTRACT

Many students were caught in academic dishonesty that includes plagiarism activity. It is one of the most negative behaviors in Malaysian society today. There are three objectives for this study: determine the level of awareness among degree students towards plagiarism, identify degree students' perception of academic integrity and identify the factors that lead to academic dishonesty among degree students. There were 351 respondents from UiTM Seremban 3 degree students involved in this study. The methods that have been used are descriptive analysis and multiple linear regression. The researchers found that in component for the level of awareness among degree students towards academic dishonesty shows that the highest mean is for item 'I know that if I break the plagiarism policy, I will face serious consequences' at 4.4644 and standard deviation = 0.7158. Other than that, students' perception of academic integrity shows that the highest percentage for "serious cheating" was collaborating with others when individual work (33.6%). Lastly, factors that leads to academic dishonesty among degree students shows that only personal attitude, academic stress and academic self-efficacy are significant towards academic cheating (p-value < 0.05). Meanwhile, gender and pressure factors are not significant towards academic cheating.

ACKNOWLEDGEMENT

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

In the name of Allah, the most gracious and the most merciful. Firstly, we are grateful to Allah S.W.T for giving us the strength to complete this final year project successfully.

This research would not have been completed without any participation and guidance of many people whose names may not all be stated. First and foremost, we would like to thank our supervisor, Sir Muhammad Hilmi bin Samian for his guidance and advice in completing research. We wish to express our sincere thanks to Dr. Nurul Nisa' binti Khairol Azmi, Madam Nurul Aini binti Abdul Wahab and Madam Noreha Mohamed Yusof for their expertise, valuable guidance and also encouragement extended to us to complete the analysis. Their help and assistance was significant in completing this report. They also taught us on preparation of materials and findings in a systematic and accurate format. Moreover, we would like to thank all our batch mates for their constant support and guidance.

We are also so grateful for opinions, brilliant ideas and constructive comments from our friends. We take this opportunity to express our sincere thanks to our families for their constant support and encouragement during the completion of this research despite the ongoing pandemic and challenges faced with online distance learning.

Last but not least, we would like to thank everyone involved in completing this research.
