ACKNOWLEDGEMENT

Bismillahirrahmanirrahim, Alhamdulillah with the blessing from Allah S.W.T I have completed the report successfully which enable me to develop and relate my syllabus requirements. A massive thanked you to those who gave me the possibilities to complete this report and I have chosen Green Building Index as the main topic.

My fully appreciation to my supervisor, Sr.Irwan bin Mohamad Ali for his constant supervision, guidance and providing information along the progression of the report. However, it would not have been possible without the assistance by the company itself for allowing me to prepare the Green Building Index report for my practical training. Generally, I would like to thank Putra Perdana Construction Sdn Bhd for giving me such an honourable opportunity to performing my training session in their project. During the training session, I have gained a lot of general knowledge and experiences of construction industry which would give me the positive platform to reach a new level in learning process.

The most appreciation is dedicated to my mother for being the best supporter throughout my internship in providing her moral and financial support. Last but not least, my special thanks to the individuals who are directly or indirectly helped me in preparing the report includes numerous consultation and copyrighted pictures and information as part of my report.

ABSTRACT

Green Building Index defines as environmental rating system tools for building. It is also is the first comprehensive rating system to evaluate environmental design and building performance. The green features are significantly to amplify the positive impacts towards the environment as well as the needs of building ability to go green in such way by adopting greener practices.

Futhermore, Green Building Index is created to reward the green environmental leadership and management in order to reduce greater environment impact to surroundings and building occupants. A building which practicing Green Building Index are able to contribute and improve the quality of human life whilst maintaining the capacity of the ecosystem at local and global levels.

Putra Perdana Construction intends to increase their landmarks as a leader player in the green construction and energy efficient buildings in Malaysia. Therefore, Serai Condominium has been shortlisted to participate in achieving Green Building Index. In Serai Project, the project has been awarded a Certified Rating where they implements officially a minimum in fulfill the basic criteria

In short, Green Building Index is able to be one of a positive platform in leading a greener development of a building system in future.
