ACKNOWLEDGEMENT

First and foremost, I am grateful to Allah the Almighty for giving me strength and sustain in good health in order for me to complete this project paper.

In the course of doing the research and writing up this report, I have encountered many difficulties that might not been possible to overcome without the assistance of knowledge and experienced personalities. I would like to take this opportunity to express my gratitude of appreciation to my project advisor Pn. Balqis Shariff, for their guidance and advice on the scope of the research that need to be done. Besides that, I also want to thank to the panel member, Dr. Subri Tahir for his continuous constructions and comments. I would like to express my sincere thanks to Pn. Shaira Ismail for her all time in-depth and a lot of comments.

I would also like to express my gratitude to all the staff at Roji Enterprise for the opportunity to do practicum training at the organization for 17 weeks and supplying information in doing this. Not forgotten to En. Rojinge Md Arshad as a supervisor during my industrial training for her kind and effort guidance me during the entire period of my internship program.

A special thanks also to my lovely parents, En.Mohamed Hatta Bin Mahmud and Pn. Mesnah Bt. Zainon for the full support during conducting this research. Their monetary and spiritual supports helped me a lot onto this level. Your wishes and dreams have brought me here.

Lastly, I am indebted to all my friend who are direct or indirect involve in helping me to complete this research. I would like to thank to all my respectable lecturers who gave their spiritual and academics encouragement. I would like to special thank for all who are involved in my research either by giving physical or spiritual support. Thank you so much.

ABSTRACT

The purpose of this study is to determine the level of awareness of safety and health among employee at the Roji Enterprise. Most of the construction projects still not entirely practice the safety and health element and the organization also suffered amount of losses due to accident and injuries at the workplace. Safety awareness among employee should be emphasized because this issue is still continuing even there are many corrective actions have been done. Besides that, many efforts have been done to solve the problem so that all employees will realize the vital of safety and health at the workplace. The research has conducted using structured question which consist the work environments, safety policy and training. The result will show whether the determinant are support and related with the level of the awareness of safety and health among employee. Then comparisons are made to show the correlation between the relationships and improve the awareness of safety and health among employee
