SEKSYEN 7, 40000, SHAH ALAM, SELANGOR**

accepted in partially fulfillment of the requirements for a Diploma in Interior Design

Report Supervisor : ..... Mohd Khedzir Khamis

Course Coordinator : ..... Abdul Hamid Mohamed

## **ABSTRACT**

Nowadays, design is one of the important thing in life. Design solves problem. Design has its function. Design has its look. The demand to be fulfilled is unlimited. More complicated design has been invented to help us live in more comfortable life. In this project, the design for disabled community is to be considered. The best designer consider everyone to see and feel their design equally.

Spa design needs a planning and its architecture. It is to create a desirable concept, developing the design and realizing the vision of the spa. Designers will analyze the key elements that will have an impact to the spa. The concept will define the design and thus, it will set a position and branding standard to the spa.

Market positioning and branding standard, spa space planning and preliminary design, budget and equipment selection is the aim for a spa project. In the planning, the site evaluation, space planning, recommended room size and allocation, defining flow and layout, HVAC, cabinetry specifications, power and water requirements are to be taken seriously in interior architecture designing process. These elements will be orchestrated in an interior design scheme to achieve an aesthetically pleasing whole. Architectural design strategy, and work with the interior designer is to co-ordinate preliminary materials and finishes for the whole spa.

Appropriate, reliable multi-functional equipment selection is crucial to the success of the Spa. Equipment selection, product choice and treatment services all work in synergy to create a profitable and pleasurable sensation for the customers. The design will reflect the project's theme. Spa needs a very delicate touch of design to produce a relaxing and calm ambience as well as holistic which is to have a healing sensation to the customers.

## **ACKNOWLEDGEMENT**

Bismillahirrahmanirrahim

Assalamualaikum w.b.t

I am very grateful to Allah because of the strength and grace had been given to me which helped me in completing this project. The title for this project is Proposed new interior design for Kakiku Reflexology Spa. The special thank goes to my helpful supervisor, Mr. Mohd Khedzir Khamis. The supports that he gave truly help in the progression and the success of this project. His co-operation is much indeed appreciated.

Deepest thanks and appreciation to my parents, family, special mate of mine, and others for their cooperation, encouragement, constructive suggestion and full of support for the report completion, from the beginning till the end. Also thanks to all of my friends and everyone, that have been contributed by supporting my work and help myself during the final semester project progress till it is fully completed .

## CHAPTER 1.0 INTRODUCTION

### 1.0 INTRODUCTION

The main purpose of this project is about the understanding of commercial design and its function as well as the ergonomic and the anthropometric for the ease of the blind community. KAKIKU REFLEXOLOGY is a spa center that provides massage for the whole body. Some of the masseuse are blind. The design must suits for both normal person and the disabled design. This project is situated at Seksyen 7, Shah Alam. The site proposed is quite strong for business. The client wants a new branch with a new look as the management has just changed. New attractive deisgn will assuredly attract more customers making this project a success. Spa design needs a planning and its architecture. It is to create a desirable concept, developing the design and realizing the vision of the spa. Designers will analyze the key elements that will have an impact to the spa. The concept will define the design and thus, it will set a position and branding standard to the spa.
