ABSTRACT

This Diploma level of Interior Design final project is towards student understanding about the interior design project's in the whole aspect that had been studied from the basic level until the design proposal presentation. The selected final project for my final semester is a proposed an upgrading work of Gallery for Malaysia Agriculture Research & Development Institute at Ibu Pejabat MARDI ,43400 Serdang Selangor Darul Ehsan. The gallery authority itself has play a big role in providing and promoting national agriculture and food science towards local citizen and foreigner. Thus it was an honor for me to get involved with the authority in making their gallery as a part of my final years project. The concept and image is also apply to both interior and exterior to appeal the centre will be able to lure more tourists and visitors who were always keen in our aesthetic values in architecture. There were several researches done to succeed this tourist information centre final project, amongst them are site analysis, building analysis, interview, observation and case studies. All these studies have a purpose of identifying the existing weaknesses and also attempt to solve some of the problems that appear. These investigations will be implemented in the design process with the intention to gain an attractive design and also suitable with the MARDI gallery demands in terms of function and aesthetic value.
