titled

**PROPOSED INTERIOR DESIGN OF KOMPANG AND REBANA GALLERY
AT LOT PT 4146 & 4147 PERSIARAN SULTAN IZUDDIN SHAH, LUMUT, 32200 PERAK
FOR INDUSTRI REBANA SAYONG SDN. BHD.**

accepted in partially fulfillment of the requirements for a Diploma in Interior Design

Report Supervisor : Mrs. Jazmin Zulkifli

Course Coordinator : Mr. Mohamed Nizam Abd Aziz

ABSTRACT

The final project for the final year students in Interior Architecture is based on all the knowledge gained from all the past semesters from semester one till semester five. All the knowledge that has been learnt from these semester will be put to the test by self proposing a final project based on real life factors such as the project itself, the client, the site and the budget. The chosen project will then go through several analysis and design processes before finally confirming the final design. The project chosen must have general issues and design issues related to them in order for it to be a visible project. Among the things that has been found that the Industry Rebana Sayong Sdn. Bhd. has plan to open a new branch gallery to commercialize kompang and rebana to the public in the Perak and the visitors. These issues then will be solved by the designers design after analyzing all the details needed before starting the design process. This project is funded by the Pusat Kraf Warisan.

ACKNOWLEDGEMENT

Bismillahirrahmanirrahim

Assalamualaikum w.b.t

First and foremost, I would like to thank ALLAH S.W.T for giving me everything that I have and making me be who I am today. To my beloved parents who are the two most important people in the whole world for all the love, the care, the education and support, without my parents support and sacrifice, i not strong to finish this project report. My studio lecturer, Mrs. Suziyanti Mantori and Miss Faiza for all the things that they have thought me in this final semester, Mr. Mohamed Nizam Abd Aziz who is my subject coordinator for INA 396 that has given me all the start till the end of the completion of this project thesis. Next is my thesis supervisor, Mrs. Jazmin Zulkifli, I would like to thank you for your positive dedication and patient towards administering my final project report and has given me guidance and supervision all through this whole project. I would also to thank my dear studio mates and group B classmates for your support, also not forgetting the Faculty of Architecture, Planning and Surveying. Other than that, I am very grateful to the owner of Industri Rebana Sayong Sdn. Bhd. that has helped me by working together with me and giving me all the information that I needed for this project thesis. It is assured that this project has magnified me with a very brilliant and moving motivation to continue working on something that is out of the ordinary and I expect this kind of opportunity would be present in the future for others to explore the beauty of Interior Architecture.

Thank you.

CHAPTER 1.0 INTRODUCTION

There are various type of rebana, the biggest rebana known is Rebana Ubi. Rebana Ubi are widely use by the Malay people in East Coast Malaysia such Kelantan or Terengganu. This type of rebana is the only rebana with a decorative pattern on the body and the face. Smaller rebana also known as Kompang is widely use by Malay when celebrating the bride and groom in a wedding ceremony.

1.1 BACKGROUND OF THE PROJECT

Industri Rebana Sayong has been in the handicrafts industry for over 20 years and founded and officially registered in August 2000. This local company is recognized by the Malaysian Handicraft . Industri Rebana Sayong labeled as a manufacturing company in the WARISAN traditional handicrafts.
