ACKNOWLEDGEMENT

In the name of god, the most gracious, the most merciful

I am definitely thankful that I have been given the strength to complete this dissertation as to fulfil the requirement of the Bachelor of Building Survey (Hons) UiTM Shah Alam. I would like to express my gratitude and sincerest appreciation to my supervisor Associate Professor Haji Amran Abdul Rahman for his invaluable guidance suggestion, encouragement and moral support during the course of this study.

Grateful appreciated is due to KTMB, Taman Budaya, and PAM Centre staff for their help and cooperation in my doing research. A special vote of thanks to the Puan Muliaayu, Pn Mahura, Mr. P. Muniandy and also to all lecturers from department Building Surveying who had helped me in this dissertation.

Last but not least, my special gratitude to my parent Haji Osman and Hajah Hamidah, not forget to my sister, Diana Osman, my brother, Muhd Azlan and Mohd Fauzi, my friend, Mohd Hasanul Israf, Rosnan Halus, Robihim Teguh, and Siti Nurhakimah Ramlee as nothing can be replace or compare their limitless love valuable support to my study and the completion of this dissertation of you are so meaningful to me.

ABSTRACT

There have many historic building in the world, such as Malaysia, Scottish, Britain, and others. Historical building is one that gives that us a sense of wonder and makes us want to know more about people and culture that produced it. It has architectural, aesthetic, historical, documentary, archaeological, economical, social and event political and spiritual or symbolic values.

In this study, the focus is on identifying various techniques to fixing to fixing fire fighting system in historical building. The study begins by looking at the current issue whereby most of historical building in Malaysia still using the original fire fighting equipment soon there will be replaced with new equipment. This study also refer to understanding how these new equipment be sensitively fixed or applied to the historical building

Two building were chosen as a case study in order to look at how the fire fighting equipment is introduced. There are Taman Budaya and Keretapi Tanah Melayu Berhad

The important of fire fighting for the historic building is to protect the properties from involve with fire and to protect all the historical value at the building. In the looking forward, all the fire fighting equipment that have at the historical building not as display but it must be maintain from the time to the time because nothing happen can be granted.

CHAPTER 1 (INTRODUCTION)	Pages
Introduction	
1.0 Historic Building	2-4
1.1 Issues	5-6
1.2 Objective of Study	6-7
1.3 Scope of Study	7
1.4 Methodology	8
Observation	
Interview	
Library Research	
1.5 Data Source	9-10
Primary Source	
Secondary Source	
1.6 Limitation	12
1.7 Chapter Arrangement	12-14
CHAPTER 2 (LITERATURE RIVIEW)	Pages
2.0 Introduction	16-17
2.1 Overview	18-19
2.2 Listed Building	20-22
2.3 Fire	23-24
2.4 Life Safety	25-28
2.5 Escape	29
2.6 Management	30
2.7 Technical Aspect	30-31

2.8	Element of Construction	31-39
CHAPTER 3 (FIRE IN HISTORICAL BUILDING)		Pages
3.0	Historic Building	41-42
3.1	Fire Protection for Historic Building	42
3.2	Fire	43
	Cause of Fire	43-45
3.3	How Fires Develop	45
	Fuels	45-46
	Air	46
3.4	Phase of a Fire	47
3.5	Fire Regulation	47-51
3.6	Fire Proofing	52
	Wood	52-53
	Paints	53-54
3.7	Mean of Escape	55-57
	Fire Doors	57-58
3.8	Active Fire Protection	58-59
	Sprinkler System	59-60
	Fire Extinguishers	61
	Classification of Fire	61-62
	The Color of Fire Extinguishers	63
	The Location of Fire Extinguisher	63-64
	Fire Alarm	65-66
3.9	Passive Fire Protection	67-69
