Faculty of Art & Design
Universiti Teknologi MARA
Cawangan Melaka
(Internal Examiner)
Date: 6 February 2022

Azahar Harun, PhD
Assoc. Prof. Dr.
Academic Writing Coordinator
Faculty of Art & Design
Universiti Teknologi MARA
Cawangan Melaka
Date: 6 February 2022

AUTHOR'S DECLARATION

I declare that the work in this thesis was carried out in accordance with the regulations of Universiti Teknologi MARA. It is original and is the results of my own work, unless otherwise indicated or acknowledged as referenced work. This thesis has not been submitted to any other academic institution or non-academic institution for any degree or qualification.

I, hereby, acknowledge that I have been supplied with the Academic Rules and Regulations for Undergraduate, Universiti Teknologi MARA, regulating the conduct of my study and research.

Name of Student : Anis Farah Aina binti Syaiful Azuan
Student I.D. No. : 2020961251
Programme : Bachelor Degree (Hons) in Graphic Design - AD241
Faculty : Art & Design
Thesis Title : Effectiveness of Cyberbullying Awareness: The Case SMK Kamil
Kelantan

Signature of Student :

Date : 6 February 2022

ABSTRACT

The purpose of this research is to look at cyberbullying issues among Malaysian teenagers. In general, this consideration is significant because the discoveries may have a favorable impact on Malaysian high school understudies. The goal of this study is to raise awareness of available solutions for dealing with cyberbullying. It is also fundamental that our youth understand the consequences of cyberbullying. A fraction of the collected information, material, photos, music, and video will be used. The purpose of the review was to differentiate the most frequently used cyberbullying medium, the association between cyberbullying encounters and students' feelings, and to compare sexual orientation with individual participation in cyberbullying among Malaysian high school understudies. Broad promotion contributes significantly to open mindfulness because it may create a perfect image that entices the audience. SDG 11 has established comprehensive and economic areas in all countries for cooperation and integration. SDG 16 inspires young people to be caring and united. The goal is to discover if those who have problems can be directed, offered support, and, eventually, addressed. One of them believes that the study will focus on how a visual plan might aid in the detection of cyberbullies. One technique for determining the prevalence of cyberbullying among Malaysian youth is the Cyber999 initiative. Promoting the showing technique to deal with cyberbullying using the application is extremely important since, according to the review, many teens in Malaysia still don't know about the application to report cyberbullying difficulties they are experiencing.
