**EVALUATING USER SATISFACTION OF
REPRODUCTIVE HEALTH INFORMATION
SYSTEM (RHIS) USING KANO MODEL:
A CASE STUDY OF LPPKN**

Master of Science (Information Technology)

Faculty of Computer and Mathematical Sciences

JULY 2014

ABSTRACT

User satisfaction is often viewed as a one-dimensional construction where the higher the perceived product quality, the higher the user's satisfaction and vice versa. However satisfying the specific product requirements to a higher level does not always infer a high level of user satisfaction. By adapting methodology from Kano's model of user satisfaction, it can define which impact the components of products have on user satisfaction. This project aims to evaluate user satisfaction of Reproductive Health Information System (RHIS) using Kano Model. This is a case study of Lembaga Penduduk dan Pembangunan Keluarga Negara (LPPKN). The objectives for this project are to evaluate user satisfaction of RHIS system using Kano's model as well as to provide recommendations to improve user satisfaction of RHIS system. The users are RHIS stakeholders which consist of Administrator, Doctor, Nurse, Pharmacist, laboratory staff and finance user. This project was conducted using two techniques which are observation and interview session in order to collect data from the RHIS stakeholders. While Frequencies Analysis and Customer Satisfaction Coefficient Analysis were used to evaluate and the evaluation data were based on the RHIS stakeholders' responses. The results from the analysis are important to know the level of user satisfaction towards the RHIS and to get the recommendations from RHIS stakeholders to improve the user satisfaction of RHIS system.

ACKNOWLEDGEMENT

In the Name of Allah, the Most Gracious, the Most Merciful

Praise be to Allah S.W.T and blessing be on His Prophet S.A.W for the ultimate guidance. I would never have been able to finish my IT Project without the guidance from people who have directly or indirectly contributed to this project.

I would like to express my deepest gratitude to my advisor, Puan Jamaliah Taslim for her excellent guidance, advice, caring and patiently corrected my writing. I would also like to thank Dr. Wan Abdul Rahim for his advice, guidance and valuable support throughout my Research Methodology class. My research would not have been possible without their helps.

I would like to extend my deepest thanks and appreciation to Ministry of Education Malaysia for offering me MyBrain15 scholarship. With their assistance, I able to complete my Master study peacefully.

I would also like to express my sincere gratitude to my supportive husband, my mother, mother in-law, father in-law and siblings. They were always supporting me and encouraging me with their best wishes.

Finally, I would like to thank all my friends who have supported my work till the end. May Allah S.W.T bless all of you. Thank you very much.
