Project Title	Evaluation of TNB Payment Kiosk

Signature of Student

Date 27 December 2015

ABSTRACT

Self-service payment kiosks are now widely used in Malaysia including at *Tenaga Nasional Berhad* (TNB). This payment kiosks become required for TNB to shorten the time of counter services. Hence *Tenaga Nasional Berhad* is applying this payment kiosk in order to improve customer experience and to gain trust. However, TNB Payment Kiosk has provided difficulty to the user with several issue such unable to display updated bill amount, no sound and alert when performing a transaction. Users are from various age groups and background which involve a lot in customer relationship. This study is related to usability and this issues is to provide the evaluation of the kiosks. This study also has developed the usability model for evaluation that contains seven factors. With the evaluation has been conducted, recommendations are provided after the issues have been identified so that developers can make enhancement to the system. This will help to improve the payment kiosks are implemented at TNB and enhance the *Tenaga Nasional Berhad* productivity in the customer service area.

ACKNOWLEDGEMENTS

First and foremost I would like to express my gratitude to Allah S.W.T, because with His mercy I am able to complete my project paper to fulfill the requirements in the IT Project course. Next, I would like to extend a grateful appreciation to all those who have contributed directly and indirectly to this report. Especially thanks to my supervisor, Puan Rogayah Abdul Majid for her valuable advice, guidance and encouragement. Not to forget, I would like also to show my grateful appreciation to family and friends for all the support given along my journey to complete this course.

I also would like to thank all the participants who took part in this study. Without the generous help of many people, it would have been very difficult for me to complete this project. I thank them all.
