ABSTRACT

Many companies have implemented Bring Your Own Device (BYOD) with the hope to provide more flexible working hour to employees and reduce of operating cost. This is a growing trend recently in corporate environment especially in context of Malaysia. In BYOD implementation, employees are allowed to do work using their own personal device like smart phone, laptop computer, netbook or tablet. The problem is whether organization is ready for the implementation and all the security concerns are addressed in realizing the benefits of the BYOD implementation. BYOD is expected to provide benefits to employee in increase of productivity, user satisfaction and work flexibility as employees are using device that they are familiar and convenient with. Besides all the benefits, information security, data control and privacy became a concern. This research is to find out the effects of security, data control, device protection and privacy issues in BYOD implementation. Responses from various IT and Non-IT Company's employee are collected for analysis. Framework for the analysis, adapted from Brodin (2015) have been used for this research. The conclusion of this study is that even though there is security issue in implementing BYOD, employee are still prefer to use their own device in regards to flexibility and convenient to perform their tasks during or after working hour. The constraints and limitation of this study is that the respondent have limited knowledge on BYOD and it is considered very new concept yet is already implemented at their office with no proper policy and control in place. It is recommended that, due to the risk of BYOD and the small size of mobile device, it is recommend that the controls and protection need to be top consideration of BYOD implementation by any organization.

ACKNOWLEDGEMENT

Praise be to Allah SWT Most Gracious, Most Beneficent

First and foremost, praise to Allah for giving me the opportunity, strength, good health and determination to complete this thesis. Without Allah blessing and permission, this thesis could not have been completed. Moreover, this thesis would not have been possible without guidance and help of several individuals who in one way or another contributed and extended their valuable assistance in the preparation and completion of this research.

First of all I would like to express my deepest gratitude to my supervisor Puan Rogayah A Majid, Encik Azhar Abd Aziz and Encik Arwin Idham for their concern, guidance, advices, ideas and support throughout my thesis completion. All of the advices, guidance's and ideas during the preparation of this study will never be forgotten.

I would like also to express my gratitude to my family especially to my wife for the constant support, understanding and prayers during my study. Not forgetting to all of my friends who gave me the idea, solution and support directly and indirectly during the completion of this project. Thank you very much for all that you have done and given to me, no words can described it best.

Thank you and may Allah bless all of you.

AUTHOR'S DECLARATION	i
ABSTRACT	ii
ACKNOWLEDGEMENT	iii
TABLE OF CONTENTS	iv
LIST OF TABLES	vii
LIST OF FIGURES	viii
CHAPTER ONE: INTRODUCTION	1
1.1 Research Background	1
1.2 Problem Background	2
1.2 Problem Statement	4
1.3 Research Aim	5
1.4 Research Questions	5
1.5 Research Objectives	5
1.6 Hypothesis	6
1.7 Research Scope	6
1.8 Research Significant	6
1.9 Research Design and Approach	7
1.10 Organizational of Chapters	8
1.11 Summary	8
CHAPTER TWO: LITERATURE REVIEW	9
2.1 Bring Your Own Device (BYOD)	9
2.2 BYOD Implementation In Organizations	11
2.3 Benefits Of BYOD	12
2.3.1 Convenience and flexibility	13
2.3.2 Increase user satisfaction	13
2.3.3 Increased personal productivity	14
2.4 Problem With BYOD Implementation	14

2.5 Security Threats Emerging From BYOD	17
2.6 Previous Study Of Security Issue With Mobile Application	20
2.7 The Theoretical Framework Associated With BYOD	21
2.8 Summary	22
CHAPTER THREE: RESEARCH METHODOLOGY	23
3.1 Research Model	23
3.2 Research Process	24
3.2.1 Problem identification	25
3.2.2 Knowledge Acquisitions	25
3.2.3 Design of instruments	26
3.2.4 Data collection	27
3.2.5 Analysis and findings	27
3.2.6 Preparing the report	27
3.2.7 Report writing	27
3.3 Summary	28
CHAPTER FOUR: RESULT AND ANALYSIS	29
4.1 Introduction	29
4.2 Quantitative Data Analysis	30
4.2.1 Demographic of sample	30
4.2.2 Usage of Device	32
4.3 Descriptive Analysis	34
4.3.1 Information Security issues	35
4.3.2 Data Control and Device Protection	36
4.3.3 Privacy issue of BYOD implementation	37
4.3.4 Effectiveness of BYOD Implementation	39
4.4 Reliability Analysis	41
4.5 Normality Analysis	42
4.6 Correlation Analysis	43
4.7 Pearson Correlation Analysis	45
4.6 Conclusion	48
